Subject: RE: NW CO Sage Grouse SocioEconomic Baseline Report - Comments DueSeptember 18, 2012
Date: Wednesday, September 05, 2012 4:52:28 PM

Hi All –

Please find link below to the Natural Amenities Scale that Rob Fetter and Josh Sidon referred to on today's call.

Thanks so much to Keith Fife for providing the link!

Hi All –

Please find notes from our WebEx today attached.

Thanks so much to all who attended.

Please let me know if you have any questions on or edits to the notes.

Thank you!

Subject: NW CO Sage Grouse SocioEconomic Baseline Report - Comments Due September 18, 2012
Importance: High

NW CO Sage Grouse EIS Cooperators:

The BLM has completed a preliminary draft section of the social and economic conditions for the Northwest Colorado BLM Greater Sage-Grouse Environmental Impact Statement (EIS). We would like to invite our cooperating agencies to comment on this preliminary draft. Attached you will find the draft section, a corresponding appendix, and a comment form.

Given the large scope of this planning effort and the aggressive timeframe for the project, the goal of this section is to highlight key components of the current social and economic landscape of the communities in northwest Colorado; especially, those communities potentially affected as a result of the management changes that may result from this planning effort. We have done our best to incorporate the information we received during and after the Economic Strategies Workshop. This report is intended to provide sufficient information for us to effectively and, as accurately as possible, evaluate the impacts of the different planning alternatives once they are developed.

The BLM requests that all comments to be submitted using the attached comment form by COB on September 18th, 2012.

Please email your comments to:

Josh Sidon

Economist, National Operations Center

Bureau of Land Management

jsidon@blm.gov

The BLM recognizes the importance of accurately characterizing potentially affected communities. The Economic Strategies Workshop that was held on June 12th in Steamboat Springs provided an initial description of our methodology for this section. During that workshop, we also solicited information from you all as well as the other members of the public. Now that we have a preliminary draft developed, we would like to provide another opportunity for our cooperating agencies to hear about our approach and to ask some clarifying questions. **The BLM will host a meeting via WebEx on September 5th, 2012 from 1:00 PM MDT to 2:00 PM MDT. The goal of this WebEx is to provide each of you with the information you need to best comment on this section.**

During this WebEx forum, BLM will:

- Briefly discuss the purpose of the social and economic conditions section;
- Provide a basic overview of the social and economic conditions section with a focus on the general indicators we attempted to characterize;
- Highlight the type of comments that will be most effective in helping us improve this document; and
- Answer questions that help you understand the purpose of this section and the type of comments that will be most valuable.

During this WebEx forum, BLM will not:

- Respond to specific comments (all content-specific comments should be submitted formally through the comment form);
- Discuss topics that are outside the scope of social and economic baseline conditions (including potential social and economic impacts, existing conditions or impacts for other resources, the management alternatives to be developed and evaluated, specific impacts (yet to be determined) on different resource uses, etc.);
- Address the purpose and need of this planning effort.

I will send you an invitation with detailed instructions on how to join the WebEx forum once we have that piece set up.

Please let me know if you have any questions at all.

Thanks so much!
