Hello all -

I am (still) working on the citation list for the draft species report. Given the FOIAs that are rolling in we need to get this done yesterday. Thanks to those who have sent me information previously - very helpful.

I'm asking those of you on this list to please take another look based on the chapters in which the citations are missing. I, and Craig Hansen, have scoured Google Scholar, the FR literature cited, citations on the sharepoint, citations on USGS, FS and BLM, etc. and we could not find these. Some of them may have been from the data call but page numbers are missing, or the years are incongruent so we couldn't find them.

Please take another look and see if you can help with these last few citations. Consider that there may be typos - I found several publications that had the wrong year entered in the report itself - usually one key stroke away from the actual year. I also found some that the order of the authors were mixed up, or only one author was cited (and usually not the primary author). If you find the citation please send the actual document as well so that I can add it to the literature folder for this effort.

Thanks again for your help. Feel free to forward this list to others if I have mistakenly excluded someone.

p
