Noreen -

A few notes about the maps that Jim will send:

- The PAC map will have the new ID map incorporated - please let Jim know if you need the old map that was in the report.

- The threats/population map will change, at least in appearance, in the new report. That map did a poor job in illustrating the threats that each PAC faces and we are working on resolving that. As for the threats themselves, each member of the COT is reviewing the matrix for their area and we are re-convening to implement a more "repeatable" analysis.

Who should Jim work with to get large maps printed? We are working on the assumption that a plotter size is what you would like - please let Jim know if you need something different. I'll be around for about another hour before I need to leave for my flight.

SubjectPAC map needed

Pat,
I would like to take a bigger copy of the PAC map and the population by risk level map to the TF meeting. Is there one of each here in the RO, or could you have someone make the file available and I will get someone here to print them?
Thanks,
Noreen
