Thanks Jim, 24 x 32 would be perfect. Can you do the same for the risk by popn map – the one that is in the draft report? I will be sure to note that it is draft and subject to change. I know Pat was thinking that the team might break down each popn inside each PAC for a finer look – is that what you expect to change?

Hi Noreen, I would be happy to make you a map of Sage-Grouse PACs. However I do have a couple questions. How big would you like? 24 x 32, 36 x 42, ...? I can make the map to size and send it to you as a PDF. You would just have to find someone to print it out. Also, when would you like it by? As for the threats/risk by population map, this will be changing quite a bit so I would rather leave that one out.

Pat,

I would like to take a bigger copy of the PAC map and the population by risk level map to the TF meeting. Is there one of each here in the RO, or could you have someone make the file available and I will get someone here to print them?

Thanks,
Noreen
