Mike,

I got the maps last week, but have not had a chance to sit down with Pat. I will do that today. I think we are good to go, but want to confirm it with Pat.

Mark see Noreen's note. We need to know where BLM is at on this or we need to escalate.
Thanks

I'll call BLM, I have not received the map yet. It shouldn't have taken them too long to produce the map.

Having a discussion on the definitions of No Surface Occupancy and Controlled Surface Use and the restrictions that are related to such designations has helped greatly. I have much more comfort with additional protections that would be afforded greater sage-grouse due to these prescriptions in the Lander plan, even though they were not specifically created to protect sage-grouse. These protections will probably protect sage-grouse beyond what would be protected by the State of Wyoming's Core Area Strategy alone.
>
> The ability to view GIS maps as we had questions was very helpful too. I would like to request a map from you if possible. The shape files I would like to see layered in the map would include; The Lander RMP boundary, areas that are closed, areas that have No Surface Occupancy, areas that have the following Controlled Surface Use - CSU restrictions in areas with limited reclamation potential soils, surface occupancy or use restricted on slopes between 15 and 24 percent, and within important scenic areas (VRM Class I and II areas), and finally the Core Areas. This map will help demonstrate the geographic coverage of these various restrictions on the Lander planning area.
