Hi Jim,

Thanks for the quick reply!

Ryan

Hi Ryan,

The PAC data is just now available for release. I have attached the PAC data for Nevada. If you need PAC data for other states please let me know. Also, if you have any problems working with the data set or accessing the Metadata please let me know.

Jim

Hi James,
I am currently working with many folks in Nevada that are concerned with Sage Grouse conservation. We noticed the COT report (http://www.fws.gov/mountain-prairie/species/birds/sagegrouse/) and associated PACs maps (Areas for Conservation (PACs) Map) were released today. Could you please send me the PACs shapefile so we figure out the overlap and non-overlap areas with our current State, BLM, and other identified areas to assist us in progressing with our sage grouse conservation objectives?
Thanks,
Ryan

The Nevada Division of Forestry (NDF) strives to improve the health and vigor of Nevada's watersheds and diverse ecosystems through increased technical assistance to landowners and land managers; develop partnerships with Federal, state and local agencies and the private sector; enforce state laws and regulations; promote scientifically-based conservation and best management practices; and educate the public on land stewardship ethics. NDF actively protects, enhances and manages the natural resources of the state through education, technical transfer and revegetation of wildfire-damaged lands. NDF provides scientifically-based

conservation and environmental education programs utilizing Nevada's natural resources and their management as educational opportunities. NDF improves the environment of our cities and communities by increasing the planting of trees and improving the care and maintenance of existing trees. NDF promotes public awareness about the important role community resources play in the quality of life for all Nevadans. http://forestry.nv.gov/
