Subject: Re: sage-grouse genetics workshop letter
Date: Tuesday, October 21, 2014 4:09:11 PM

The 8a meeting is actually among Dan, the DDs, and Anna. Anna will bring it up there to confirm that Dan is prepared to go to the mat if needed. She doesn't need anything more. We'll get it in the right place. -- GDF

She indicated the House Republican letter on the sage-grouse genetics workshop had not been downgraded to Director-level signature, but thought if we wanted it, she would provide Dan with the compelling information as to why it should be and he can take it to the 8am meeting. I think we should, if possible, so that we can continue to control messaging on our process and I'm happy to put together something for Anna saying the genetics workshop was initiated by FWS to generate information for a FWS process and we are happy to coordinate with USGS to make sure they agree with the content, but it should be signed by Dan. Let me know what you think.
