Date: Friday, March 28, 2014 8:04:47 AM

All,

To be sure we all fit comfortably into the conference room, we moved the meeting upstairs (3710) to a larger and more tech ready conference room.

Thanks,

Eric Ellis

> All. I see the order of the agenda has changed. I strongly recommend before we can even begin discussing the issue of hard and soft triggers we need to agree on the basic biology of sage grouse and how they are using the landscape. For this reason I am recommending we move the SGMA paper back to the front of the meeting. This paper has significant information upon which to build the discussion. We would reference it in any discussion on hard or soft triggers. So it would seem all should have access to the information as a common knowledge base. We appreciate your consideration. management strategies for each BLM/FS planning process. The NV and WY approaches were developed through BLM/FS/state coordination in those states.

I look forward to a good discussion on Friday.

> The meeting will provide a first look at the state's baseline maps, focusing on the Box Elder SGMA, briefly review recent research by USU concerning the SGMAs, and initiate discussions about the proposed 3% and 5% disturbance caps in Utah, and the potential for, and parameters of, an adaptive management process for lands in Utah. A draft agenda is attached. Follow-up meetings and discussions will be required, no doubt.
