Okay, just sent it to you via my personal email account. Let me know if you get it and also make sure you can open it. It is a file type that seems a bit atypical.

Thanks-
Amy

Amy,

I wasn't able to receive the document. It also wasn't attached to the email you sent to Ben with your

comments. I think you're right –it's too large. From my perspective, we can do one of two things. We can transmit it through Drop Box (or another web service), or we can set up a client access account through the SWCA website that you can drop it into. I think Drop Box might be easier if you have access to it. I ask because the website is blocked to me and I've had to ask IT to un-block it for the day. Either way works for me. What works best for you?

Thanks,

Amanda Christensen

Hi Amanda,
The article you requested is 12 MB in size. I just emailed it to you a few minutes ago, but am concerned it may not come through given its size. Can you let me know if you receive it? If not, I will figure out a different way to get it to you.

Best regards,
Amy

Amy,

Your comments on the admin draft of the Alton Coal SEIS mention Frey,S. Nicole, R. Curtis and K. Heaton, July 2013, Home Range and Movements of Greater sage-grouse in its Southern-most Distribution, Utah State University Extension Bulletin *in press.* Do you have a copy of this article? If so, could you send it to me?

Thanks,

Amanda Christensen
