Date: Monday, May 12, 2014 4:23:02 PM

Lara and all,

I hope I didn't *promise* a demo tomorrow. I'll be sitting in SLC airport and not sure what kind of connection I will have. I would ask Matt to lead a demo but we both are preparing for & traveling to a Steering Committee meeting tomorrow & not sure where he's at with his prep. Matt can let us know if he has time to lead a demo - I can chime in if he can lead. At very least, I'll work on the doc and join the phone call.

Sorry if this adds a wrinkle ...

side note. If not then it's good.

4. Appropriate Projections
    - There needs to be a definition of appropriate. And there should be suggested or recommended projections (Range Wide, State level, ...)
5. FWS Cartographic Standards
    - As I understand it right now there are no service wide Cartographic Standards (Across all Programs/Regions/...)
    - I suggest focusing on required map elements and the suggested style guides and map templates

Like I said, just some thoughts that came to mind,
Jim

If you would all take a look at this and provide changes for next week, that would be great. I especially would like your ideas/input on the Delivery and Uploading section, as this applies to our use of LC MAP and I believe will add workload to our LC MAP gatekeepers.
