Thanks, Terry. This is very timely in that we are looking at occupied habitat delineation in this area TODAY. Quite a coincidence. These data will be very useful in that regard.

Tom

Can Terry provide a shapefile of the map? I'd like to import the points into Nyssa's GIS.

Here are the coordinates (44.94493, -104.05595) for the lek.

I also have attached an old map I made of the movements. This is from Kaczor telemetry data from Butte Co.

Hey Terry -

I followed up with Tom Christiansen of Wyoming G and F, and he is willing to pursue the core area on the WY side. But he needs the data that would support the designation. So can you provide that? He doesn't want to drag Travis in right now and create a difficult position for him....
