Morning, Kathy.

We just got updated direction from Noreen on the below. Pending some additional feedback from Dan, we (R6) will draft a succinct .ppt for Dan/Noreen to deliver that address some key issues 17 months out from our determination. We will need similarly succinct updates on federal and state planning efforts in several key states, including:

NV, WY, MT, ID, UT, and OR

We have near-current info on state planning efforts from the data call we did two weeks ago but **may** need updates on federal planning efforts for these states. I'm looping the affected PLs so they have a heads up we'll likely need a short summary of where they/their IDT folks are in working with BLM-FS to refine the draft plans. (We'll need to have the .ppt ready in the next 48 hours.) Either way, we'll circle back once we have further details on this product.

Thanks.

Matt

Hi Pat, Enjoy your spring break!!!

Hi Matt, Robyn T will be attending the secretarial briefing and I've been tasked with preparing info to get her up to speed on R1 sage grouse specifics. We'll most likely be briefing Robyn on Wed pm as Terry will be wolverining on Thurs and Fri.

Hi Kathy -

Matt Kales will be your contact on this. We don't yet know the focus of the briefing, so he will be working on it next week in my absence. Let me know if you have any questions!
