

U.S. Fish & Wildlife Service

The Aquatic Animal Drug Approval Partnership Program

Fact Sheet: CCP INAD 8391

INAD objective/purpose:	Collect supportive and pivotal data needed to establish the effectiveness of CCP to induce gamete maturation in a variety of fish species.	
Drug name:	Common Carp Pituitary	
Source of drug:	Stoller Fisheries	Argent Laboratories
Address:	1301 18 th St; P.O. Box B Spirit Lake, IA 51360	8702 152 nd Avenue, N.E. Redmond, WA 98052
Contact:	Phone: 800-831-5174 email: stollerfisheries@mchsi.com	Phone: 800-426-6258 email: email@argent-labs.com
Target pathogen(s):	Not applicable	
Method of administration:	IP or IM injection	
Treatment dosage:	up to 25 milligrams (mg) CCP per kilogram (kg) body weight. Although certain situations may require a higher dose rate, dosage should never exceed 25 mg CCP per kg body weight	
Treatment regimen:	Single or multiple treatment. Multiple treatment will generally consist of a single "priming dose," followed by a single "resolving dose."	
Withdrawal period:	No withdrawal period is required for treated fish.	
Required test parameters:	Investigator must collect data reporting percent ovulation and/or percent spermiation in treated fish. Investigator should also report general fish behavior and any adverse effects relating to treatment.	
Limitations or restrictions on use of drug:	Investigator must follow all instructions in the Study Protocol for INAD 8391 regarding drug acquisition and handling, fish treatment and disposition, and data reporting requirements. Drug discharge must be in compliance with local NPDES permitting requirements.	
Required INAD fee:	\$400.00 per facility per year
