Dear Hawaii Nature center friends,

Thank you for a amazing day at Kealia Pond, I really enjoyed Walk About, Bird Watching and Mucking in the Mud. I especially liked Mucking in the Mud. I liked to see the Woodenducks and insects: Nymphs (Dragonfly tiny red worms, green worms waterbugs - swiftly swimming spiders in the under water. I also liked the Bird Watching because I was able to see Sedges and the Hawaiian Coots were Puffy and fighting in there territory. I also see Aeo walking and running in the water. The Walk About was fun because we were able to see a tiny Apple sea shells I also see salt crystals sparkling in the dirt. I learned so much from my time at Kealia Pond, I learned that the pickylweed is bad for baby birds. My favorite part was when we caught the water bugs, because I caught a Dragonfly waterbugs and green worms. Kealia Pond was a great field trip and I look forward to visiting there again. Aloha Maycean #22
