

## Peer Review of Scientific Information Checklist

1. Title: Estimating abundance of Aleutian cackling geese using Pollock's robust design models.
2. Description: This manuscript presents results for estimating abundance of Aleutian cackling geese from mark-resight data.
3. Estimated dissemination date of the final version of the document: May 2009
4. Kind of peer review that will be conducted: Individual letters from reviewers selected by the editor of the scientific journal.
5. Anticipated number of reviewers: 3
6. Reviewer selection method: Reviewers selected by journal editor following standard protocols.
7. Primary disciplines or expertise needed in the review: Reviewers will have expertise in quantitative methods for analyzing mark-resight data.
8. Estimated start date of peer review: 15 April 2008
9. Opportunities for the public to comment on the work product to be peer reviewed: Public comment will not be sought, but the public may comment via letters to the editor of the journal after publication.
10. Indicate whether the public, including scientific or professional organizations, will be asked to nominate potential peer reviewers: The public, including scientific and professional organizations will not be asked to nominate potential peer reviewers. Peer reviewers will be selected by the editor of the scientific journal.
