

ATTENTION WATERFOWL HUNTERS

CAUTION: DROUGHT CONDITIONS!

Due to drought conditions, some water is present for hunting, but the desired level of flooding is not currently possible. Waterfowl hunters will encounter less than desirable water levels for boats until significant rainfall produces sufficient water to resume scheduled flood level conditions within the refuge's impoundments. Some blinds may be easier to access than others. Access is at the hunter's discretion!

Important Items:

- *Mud motors are HIGHLY RECOMMENDED!*
- *Some ponds & access creeks may only have a few inches or less of water*
- *Blinds will not be grassed for the Youth Waterfowl Hunt on October 4.*

Please call the Refuge Office at (302) 684-8419 prior to your hunt for information on the latest conditions of the refuge's impoundments.
