

**ECONOMIC ANALYSIS FOR
HYDROPOWER PROJECT RELICENSING:
GUIDANCE AND ALTERNATIVE METHODS**

Prepared for:

Division of Economics
U.S. Fish and Wildlife Service
U.S. Department of the Interior

Prepared by:

Robert Black, Bruce McKenney, and Robert Unsworth
Industrial Economics, Incorporated

Cambridge, Massachusetts 012140

and

Nicholas Flores
University of Colorado, Boulder

October 1998

TABLE OF CONTENTS

PREAMBLE	i
INTRODUCTION AND SUMMARY.....	CHAPTER 1
Purpose of the Report	1-2
Report Summary	1-3
Legal and Regulatory Context for Hydropower Relicensing	1-3
FERC's Current Economic Methodology.....	1-4
Potential Refinements to FERC's Economic Methodology	1-6
Research Methods for Assessing Non-Power Values.....	1-8
Structure of the Report.....	1-9
OVERVIEW OF THE FEDERAL POWER ACT AND THE HYDROPOWER RELICENSING PROCESS	CHAPTER 2
The Federal Power Act As Amended by the Electric Consumers Protection Act.....	2-2
FPA Section 4(e).....	2-3
FPA Section 10(a).....	2-4
FPA Section 10(j)	2-5
FPA Section 18	2-6
The National Environmental Policy Act.....	2-6
Other Federal Statutes Affecting Relicensing	2-8
The Fish and Wildlife Coordination Act	2-8
The Endangered Species Act	2-9
The Clean Water Act	2-9
Other Statutes Relevant In Special Cases	2-10
Relevant Court Rulings.....	2-11
Major Steps in the Relicensing Process	2-13
Step 1: Decision To File and Initial Actions.....	2-13
Step 2: Consultation Package	2-14
Step 3: Study Development and Execution	2-15
Step 4: Draft Application.....	2-16
Step 5: Application Filing.....	2-16

TABLE OF CONTENTS (continued)

Step 6: Application Processing and NEPA Compliance	2-17
Step 7: License Issuance	2-18
An Alternative to the Traditional Relicensing Process.....	2-18

FERC'S ECONOMIC METHODOLOGYCHAPTER 3

Purpose of FERC's Economic Analysis.....	3-2
Overview of FERC's Economic Methodology	3-3
Key Concepts and Assumptions	3-5
Baseline For Analysis	3-5
Treatment of Inflation.....	3-6
Discount Rate and Time Period for Analysis	3-7
FERC's Approach to Estimating Annual Net Benefits	3-9
Annual Gross Power Benefits.....	3-9
Annual Costs of Operation	3-13
Annual Costs of Environmental Measures	3-14
Annual Net Benefit Calculation.....	3-16
Factors Not Explicitly Incorporated In Annual Net Benefit Estimates	3-17
Annual Benefits of Avoided Pollution.....	3-17
Annual Benefits of Project Services	3-18
Annual Benefits of Environmental Measures	3-19

POTENTIAL REFINEMENTS TO FERC'S ECONOMIC METHODOLOGYCHAPTER 4

Two Perspectives on Net Benefits: Society and the Applicant	4-2
FERC's Treatment of Applicant and Societal Perspectives	4-3
Clarifying Societal and Applicant Perspective on Relicensing Alternatives	4-4
Integrating Non-Power Benefits	4-5
Use Value.....	4-6
Non-Use Value.....	4-6
Incorporating Non-Power Benefits in FERC's Economic Analysis.....	4-7
Review of FERC's Key Assumptions	4-10

TABLE OF CONTENTS (continued)

Discount Rate.....	4-10
Baseline for Analysis.....	4-14
Recommended Refinements to Currently Quantified Estimates 4-16	
Annual Gross Power Benefits.....	4-17
Annual Costs of Operation	4-21
Annual Benefits of Avoided Pollution.....	4-24
Summary	4-29

PRIMARY METHODS AND KEY CONCEPTS FOR VALUING NON-POWER BENEFITS.....CHAPTER 5

Overview of Economic Valuation	5-2
Willingness to Pay	5-3
Consumer Surplus.....	5-3
Overview of Valuation Methods.....	5-5
Revealed Preference Models	5-9
Market Supply and Demand Models	5-9
Travel Cost Models.....	5-12
Property Valuation Models.....	5-15
Stated Preference Models	5-17
Contingent Valuation.....	5-17
Other Stated Preference Approaches	5-23
Methods for Valuing Project Services.....	5-24
Added or Averted Cost Approach	5-24
Factor Income Approach.....	5-26
The Marginal Value of Instream Flow: A Special Application of Primary Methods... 5-27	
Marginal Value Concept.....	5-27
Application to Hydropower Relicensing	5-28
Data and Resource Demands	5-30

SECONDARY METHODS FOR VALUING NON-POWER BENEFITS: BENEFITS TRANSFER.....CHAPTER 6

TABLE OF CONTENTS (continued)

Overview of Benefits Transfer.....	6-3
Basic Steps for Conducting Benefits Transfer.....	6-3
Types of Benefits Transfer.....	6-7
Limitations and Appropriate Uses of Benefits Transfer.....	6-8
Using Benefits Transfer to Value Recreational Fishing	6-9
Valuing Changes in the Level of Recreational Fishing Activity	6-10
Valuing Changes in Fishery Quality.....	6-15
Additional Sources of Information on Recreational Fishing Values.....	6-19
Valuation of Whitewater Recreation	6-20
Other Recreational Activity	6-22
Using Instream Flow Studies in a Benefits Transfer	6-22
Marginal Benefits of Instream Flow	6-22
Marginal Cost of Foregone Power.....	6-27
Comparing Benefits and Costs of Streamflow.....	6-28
Estimating Non-Use Values Using Benefits Transfer	6-30
Relevant Contingent Valuation Studies.....	6-30
Applying Existing Estimates in Benefits Transfer	6-33
CASE STUDIES.....	CHAPTER 7
Morris Sheppard Dam: Valuation of Instream Flow Using Benefits Transfer	7-1
Licensing Alternatives	7-2
Non-Power Benefits Analysis.....	7-3
Comparison of Instream Flow Benefits to Adverse Effects	7-5
Potential Refinements	7-6
Elwha and Glines Canyon Dams: Using Contingent Valuation to Estimate Dam Removal Benefits	7-6
Survey Design and Implementation.....	7-8
Results of the Contingent Valuation Survey.....	7-10
Comparison of Benefits to Costs	7-10
Edwards Dam: Applying Primary and Secondary Methods To Compare Dam Removal Costs to Recreational Benefits.....	7-12

TABLE OF CONTENTS (continued)

Value of Improved Recreational Fishing.....	7-13
Value of Whitewater Rafting.....	7-15
Comparison of Costs and Benefits.....	7-16
Assessing Aesthetic Benefits of Increased Streamflow.....	7-18
Overview of Loomis and Feldman Study	7-18
Survey Design.....	7-18
Willingness to Pay Results	7-19
Comparison of Marginal Benefits and Costs	7-21

Appendix A: Regional Economic Modeling Applications in Hydropower Relicensing

Appendix B: Acronyms

Appendix C: Glossary
