SUPPLEMENTARY INFORMATION:

Background

On September 30, 2022, we published a proposed rule (87 FR 59598) to consider revisions to regulations authorizing the issuance of permits for eagle incidental take and eagle nest take under the Bald and Golden Eagle Protection Act (16 U.S.C. 668-668d). The purpose of these revisions is to

increase the efficiency and effectiveness of permitting, facilitate and improve compliance, and increase the conservation benefit for eagles. In addition to continuing to authorize specific permits, we propose the creation of general permits for certain activities under prescribed conditions. We propose a general permit option for qualifying wind-energy generation projects, power line infrastructure, activities that may disturb breeding bald eagles, and bald eagle nest take. We propose to remove the current third-party monitoring requirement from eagle incidental take permits. We also propose to update current permit fees and clarify definitions.

With this document, we are announcing an extension of the comment period for an additional 30 days (see **DATES**, above) to allow the public further opportunity to provide comments on the proposed rule.

If you already submitted comments or information on the September 30, 2022 (87 FR 59598), proposed rule, please do not resubmit them. Any such comments are incorporated as part of the public record of the rulemaking proceeding, and we will fully consider them in the preparation of any final rule.
