

U.S. Fish & Wildlife Service
Sacramento Fish & Wildlife Office
Building Partnerships

In addition to forming partnerships with private landowners, the Partners for Fish and Wildlife Program and the Coastal Program work with private organizations, and local, state, or other Federal government programs.

It is common to have multiple partners participating in the same project. Working together allows us to develop and fund more restoration projects and incorporate our local partners' expertise.

Listed below are some of the organizations we have partnered with in the past to support habitat restoration in California. We do not control the content or policies of their web sites
