

Dexter National Fish Hatchery & Technology Center Dexter Fish Health Unit Biographies

Teresa D. Lewis, PhD, Acting Fish Health Unit Leader

Expertise: Fish Health Biologist. Dr. Lewis joined the Dexter Fish Health Unit on October 26, 2008. Dr. Lewis is originally from Oklahoma and earned her PhD in Marine and Marine Science/College of William and Mary. She has collaborated with many partners while in Hawaii, including the Hawaii Aquaculture Development Program, NOAA Sea Grant, USGS National Wildlife Health Center, Pacific Island groups and local Aquaculture businesses to address animal health issues. Dr. Lewis is very hands-on in her approach to fish health diagnostics and has strong ties with the fish health communities throughout the U.S.

Marlene Rodarte, B.S., Fish Biologist

Expertise: Fish Health Biologist. American Fisheries Society -Certified Fish Health Inspector. Mrs. Rodarte spent 12 years at the Bozeman Fish Health Center before relocating to the Dexter Fish Health Unit in July 2006 where she conducts virus, bacteria, and parasite testing for aquatic animal pathogens on our Federal hatcheries, free ranging fish and other diagnostic tests.

Jason Woodland, M.S., Fish Biologist

Expertise: Fish Health Biologist. American Fisheries Society -Certified Fish Health Inspector. Mr. Woodland began working for the U.S. Fish and Wildlife Service - Fish Health Center in 2000 and conducts virus, bacteria, and parasite testing for aquatic animal pathogens on our Federal hatcheries, free ranging fish and other diagnostic tests. Mr. Woodland assists in representing USFWS Region 2 and the Dexter Fish Health Unit by participating on National committees for issues related to the National Wild Fish Health Survey and hatchery procedures.
