

This is a collection of websites that are useful in the spring to keep our pulse on the current water year conditions.

http://cdec.water.ca.gov/cgi-progs/products/PLOT_SWC.2012.pdf
Snow-Water content graph – updated daily

<http://cdec.water.ca.gov/cgi-progs/reports/PAGE6>
Snow course information

<http://www.water.ca.gov/waterconditions/>
DWR water conditions website with links to various precipitation, snowpack, and reservoirs data for current conditions.

<http://droughtmonitor.unl.edu/>
United States drought monitor – index of drought conditions. Updated weekly.

http://www.cpc.ncep.noaa.gov/products/expert_assessment/seasonal_drought.html
US Seasonal Drought Outlook – NOAA Climate Prediction Center

http://www.cpc.ncep.noaa.gov/products/predictions/long_range/poe_index.php?lead=2&var=p
NOAA Precipitation forecast – Probability Of Exceedence (POE) – National

http://www.cpc.ncep.noaa.gov/products/predictions/long_range/poe_graph_index.php?lead=2&climdiv=89&var=p
NOAA Precipitation forecast – Probability Of Exceedence (POE) – Climate Division 89

<http://www.usbr.gov/mp/cvo/>
CVP Water Supply Report (under Daily Reports, upper left of main page)
Water Operations Analysis (under Operations Analysis and Accounting, lower left of main page)
<month> 2012
50% Water Ops Summary (PDF)
90% Water Ops Summary (PDF)

<http://cdec.water.ca.gov/wquality/>
Trinity River mean daily temperatures at various locations by month

<http://cdec.water.ca.gov/snow/bulletin120/#>
DWR Bulletin 120

<http://www.wrh.noaa.gov/forecast/prodsuite/prodsuite.php?wfo=sto>
The site yields a convenient summary table of many other NWS links. The Eureka/Sacto/Medford columns are the ones to focus on. The upper Trinity is in the Eureka office column, but the Medford and Sacto boxes apply to nearby too (Shasta Dam for Sacto office, and Mt Shasta north, the Medford column).
