

FWS RAPP Cultural Resource Measures–Updated May 31, 2007

	Measure	Definition
1	Has the station completed a cultural resource overview?	An overview characterizes information on the history and prehistory of the refuge and immediate geographical area. These can be stand alone documents or part of a larger document and may include information on known resources, review of previous work in the area, identification of threats and data gaps, and recommendations for future work. See FWS 614 FW1 for further definition.
2	If no, give targeted year to complete	If a cultural resource assessment has not been completed, what is the target year to complete cultural resource assessment?
3	Total number of historic buildings or structures	Includes all known buildings or structures over 50 years old on refuge fee title land..
4	Number of historic buildings or structures in good condition	"Good" is defined as any buildings or structures included in measure 3 that need minimal repair or routine maintenance.
5	Total number of archaeological sites	Number of archaeological sites, including prehistoric and historic, recorded on refuge fee-title land.
6	Number of archaeological sites in good condition	"Good" is any site included in measure 5 that has no observable impacts that will result in significant damage..
7	Total number of accessioned museum property collections	Include every individual FWS museum property collection that has been accessioned by FWS or any other institution.
8	Number of curation facilities housing FWS collections under good conditions	Number of facilities holding accessioned collections that meet the standard of "good" for museum property collections. Curation facilities are considered to be in good (or better) condition when the spaces collectively meet more than 70% of applicable departmental standards for such spaces [411DM3.2-3.3].
9	Total number of known paleontological sites	Number of paleontological sites recorded on any refuge fee-title land.
10	Number of known paleontological sites in good condition	"Good" is defined as any site included in measure 9 having no observable impacts that will result in damage to the fossils or the fossil bearing formation.
Box 14 in RAPP workbook	Number of cultural resources management actions accomplished this year	Number of projects that were reviewed for cultural resource concerns.
