Introduction

The U.S. Fish and Wildlife Service is the principal federal agency responsible for conserving, protecting, and enhancing fish, wildlife, and plants and their habitats for the continuing benefit of the American people.

The vast majority of fish and wildlife habitat is on lands not owned by the federal government. Partnerships with Native American tribes, state and local governments, nongovernment organizations and private citizens are critical to the Service fulfilling our mission. Programs such as Partners for Fish and Wildlife, Partners in Flight, the Coastal Program, and partnership activities with individuals are the primary mechanisms for assisting in voluntary habitat restoration on non-Service lands and fostering conservation practices throughout the Region.

The Service manages the 95 million-acre National Wildlife Refuge System that consists of 545 National Wildlife Refuges and thousands of small wetlands and other special management areas. The Service also carries out its mission through the 81 ecological services field stations, 69 national fish hatcheries, and 63 fish and wildlife management offices located nationwide.

The agency enforces federal wildlife laws, manages migratory bird populations, restores nationally significant fisheries, conserves and restores fish and wildlife habitat such as wetlands, administers the Endangered Species Act, and helps foreign governments with their conservation efforts. The Service also administers a number of grant programs that promote the restoration of fish and wildlife resources and their habitat on tribal and private lands.

The Service also oversees the Federal Assistance program that distributes federal excise taxes on fishing and hunting equipment to state natural resource agencies. This program is a cornerstone of the nation’s wildlife management efforts, funding fish and wildlife restoration, boating access, hunter education, shooting ranges and related projects across America.

Approximately 7,500 people are employed by the Service at facilities across the United States. It is a decentralized organization with a headquarters office in Washington, D.C., seven geographic regional offices, and nearly 700 field units.

Quick Facts

- 545 national wildlife refuges
- 96 million acres of fish and wildlife habitat
- 81 ecological services field stations
- 69 national fish hatcheries
- 63 fish and wildlife management offices
- 7,500 employees
Quick Facts

- Employment: 1,088 people
- Acres Managed: 1.29 million
- The Fiscal Year 2006 Budget for Regional Service activities totaled $86 million
- More than 7.7 million people visited Refuges throughout Region 3 to hunt, fish, participate in interpretive programs, and view wildlife
- More than 150,000 school children participated in Service educational programs
- 130,655 acres of wetlands restored
- 483 miles of streams restored
- 105,747 acres of upland habitat restored

The Region is Committed to

- Expanded partnerships offering innovative opportunities to enhance the Region’s fish and wildlife resources
- Healthy fish and wildlife trust species populations and habitats to support them
- Providing the public with quality hunting, fishing, wildlife watching, and other wildlife-dependent recreational opportunities on Service lands
- An organization dedicated to employee excellence, reflecting the nation’s rich diversity, and providing quality service to and decision-making for the resources for which we have trust responsibility (migratory birds, threatened and endangered species, interjurisdictional fish).

Regional Programs and Offices

- 55 National Wildlife Refuges, including the newest – Glacial Ridge in northwest Minnesota
- 12 Wetland Management Districts
- More than 300,000 acres in waterfowl production areas
- 6 National Fish Hatcheries
- 6 Fishery Resources Offices
- 2 Sea Lamprey Control Stations
- 8 Private Lands Offices
- 9 Ecological Services offices
- 18 Law Enforcement offices

Federal Assistance Program

In Fiscal Year 2006, the Region’s Federal Assistance Office managed $153 million to help strengthen sport fish and wildlife restoration programs throughout the eight-state region.

Fiscal Year 2006 Federal Assistance Program Grants by State (In Millions)
Minnesota

Fish and Wildlife Service Highlights

Federal Assistance to State Fish and Wildlife Programs
- In 2006 Minnesota received:
  - $12.8 million for sport fish restoration
  - $7 million for wildlife restoration and hunter education

Waterfowl Production Areas
Incorporated into the refuge system in 1966, nearly 95 percent of waterfowl production areas are located in the prairie wetlands or “potholes” of the Dakotas, Minnesota, Montana and Wisconsin. If wetlands in this vast prairie pothole region were not saved from drainage, hundreds of species of migratory birds would have been seriously threatened or become extinct.

Although waterfowl production areas, easements, and National Wildlife Refuges account for less than 2 percent of the landscape in the prairie pothole region states, they are responsible for producing nearly 23 percent of this area’s waterfowl. That is why working with private landowners through voluntary partnerships to enhance wetlands is so critical to protecting waterfowl.

By law, waterfowl production areas are open to hunting, fishing, and trapping. Other important wildlife-dependent uses include wildlife observation, photography, and environmental education.

Protecting Endangered Species
The Twin Cities Ecological Services Field Office works to conserve and protect the 16 federally listed endangered, threatened or candidate species in Minnesota. Actions to save these species from extinction result in improved water quality, preservation and restoration of natural areas, clean up of contaminants, and restoration of degraded rivers and streams.

The Service leads recovery work for the winged mapleleaf, an endangered species considered to be one of the rarest freshwater mussels in North America. The Twin Cities Ecological Services Field Office works with researchers from the University of Minnesota, Minnesota Department of Natural Resources, USGS, the La Crosse Fishery Resource Office, and National Park Service. Recent accomplishments include identifying channel catfish and blue catfish as suitable hosts, undertaking river studies to ensure artificial propagation and reintroduction follows the mussels’ natural cycle, and monitoring range expansion of invasive zebra mussels.
Agassiz
National Wildlife Refuge

Quick Facts

Refuge Facts
- Established: 1937
- Acres: 61,500 (4,000 in wilderness)
- Refuge name changed from Mud Lake Migratory Waterfowl Refuge in 1961
- Maintains a resident moose herd

Financial Impact of Refuge
- Eleven person staff
- 20,000 visitors annually
- FY 2006 Budget: $1.5 million

Refuge Location
The refuge is located 12 miles north of Thief River Falls and 11 miles east on County Road 7

Natural History
- First drainage district organized to convert the marshes into arable land in 1909
- Approximately $1 million had been spent on the drainage system by 1933
- Tax assessments forced the state legislature to absorb the drainage taxes and authorize the land to be purchased as a wildlife refuge
- The refuge lies in the bed of glacial Lake Agassiz in a transition zone between coniferous forests and the prairie pothole region
- Supports 287 species of birds and 49 species of mammals

Refuge Objectives
- Provide resting, nesting and feeding habitat for waterfowl and other migratory birds
- Provide habitat for resident wildlife
- Protect endangered and threatened species
- Provide for biodiversity
- Provide public opportunities for outdoor recreation and environmental education
- Conduct research

Highlight
The refuge is engaged in research that is unlocking the natural history secrets of American and least bitterns, moose and timber wolves

Priorities
- Construct trails, observation areas and environmental education facilities

Highlight
The refuge is engaged in research that is unlocking the natural history secrets of American and least bitterns, moose and timber wolves

Public Use Opportunities
- Wildlife observation
- Environmental education
- Auto tour route
- Hunting (big game)
- Two hiking trails
- Visitor center

Refuge Manager: Margaret Anderson
22996 - 290th Street Northeast
Middle River, MN 56737

Phone: 218-449-4115
Fax: 218-449-3241
TTY: 1-800-877-8339 (Federal Relay)
E-mail: margaret_anderson@fws.gov
http://midwest.fws.gov/agassiz
Big Stone
National Wildlife Refuge and Wetland Management District

Quick Facts

Refuge Facts
- Established: 1975
- Acres: 11,521
- Part of the Big Stone-Whetstone River Project of Minnesota and South Dakota
- Land originally purchased by the U.S. Army Corps of Engineers and transferred to the Service

Financial Impact of Refuge
- Nine person staff
- 30,000 visitors annually
- FY 2006 Budget: $1.8 million

Refuge Location
The refuge is located three miles southeast of Ortonville, Minnesota, on Highway 7

Natural History
- Refuge consists of wetlands and grasslands located in the tallgrass prairie life zone
- Contains more than 6,000 acres of grassland, including large tracts of native prairie
- Major waterfowl production and migration area
- Maintains the only population of ball cactus in Minnesota
- Refuge serves as a wintering area for as many as 1,200 whitetail deer
- Unique features include the lichen covered granite outcrops for which the refuge was named
- Maintains a population of reintroduced river otters

Refuge Objectives
- Provide resting, nesting and feeding habitat for waterfowl and other migratory birds
- Provide habitat for resident wildlife
- Protect endangered and threatened species
- Provide for biodiversity
- Provide public opportunities for outdoor recreation and environmental education

Highlight
- The refuge is engaged in shorebird research focused on increasing our knowledge of their length of stay on fall migration sites and the value of temporary/seasonal wetlands

Priorities
- Construct a new visitor center
- Construct entrance roads, approaches, parking lots and install culverts where needed on all Waterfowl Production Areas
- Expand the biological program and the refuge’s ability to restore degraded habitats

Public Use Opportunities
- Hiking
- Hunting and fishing
- Environmental education
- Wildlife observation
- Auto tour route

Contacting the Refuge
Refuge Manager: Alice Hanley
44843 County Road 19
Odessa, MN 56276

http://midwest.fws.gov/bigstone
Quick Facts

Refuge Facts
- Established Oct. 12, 2004
- Acres: 2,300
- Authorized 37,756 acres
- Twenty-six cooperating agencies, led by The Nature Conservancy and Polk County Commissioners, provided the catalyst for this prairie restoration project, culminating in the establishment of the 545th National Wildlife Refuge

Financial Impact of Refuge
- Currently managed with the four-person staff of Rydell NWR

Refuge Location
The refuge is located 6 miles west of Mentor, Minnesota

Natural History
- Beach ridges formed from Glacial Lake Agassiz, vegetated with true tallgrass prairie is the heart and soul of the refuge. The ultimate restoration of 8,000 acres of wetlands and 15,000 acres of prairie will complement the existing 5,000 acres of untilled native prairie.
- The return of the greater prairie chicken will be the star of success

Refuge Objectives
- Strive to maintain diversity and increase abundance of waterfowl and other migratory bird species dependent of prairie wetland and grassland habitats
- Conserve, manage, and restore the diversity and viability of native fish, wildlife and plant populations associated with tallgrass prairie and prairie wetlands
- Work in partnership with others to restore or enhance native tallgrass prairie, prairie wetlands and unique plant communities
- Restore, enhance, and protect water quality and quantity that approach natural hydrologic functions
- Provide for compatible wildlife-dependent recreational uses by the public, emphasizing increased understanding of the northern tallgrass prairie ecosystem and the mission of the National Wildlife Refuge System

Public Use Opportunities
- Wildlife observation and photography highlighted by greater prairie chicken, and migrating waterfowl and sandhill cranes
- Environmental education and interpretation
- Hunting

Future Public Use Opportunities
- Walking, biking and cross country ski trails
- Interpretation of historic Pembina Oxcart Trail
- Observation Platforms
- Interpretive center
- Deer, migratory bird and upland game hunts for youth and persons with disabilities

Hamden Slough
National Wildlife Refuge

**Quick Facts**

**Refuge Facts**
- Established: 1989
- Acres: currently 3,170
- Authorized 5,944 acres
- Inter-agency team completing private land habitat improvements adjacent to refuge
- The refuge is the culmination of a 50-year effort to protect and restore the area

**Natural History**
- Refuge consists of rolling hills, grassland and small wetlands
- Located in a transitional zone between flat tallgrass prairies and rolling hardwoods
- Restoration efforts have attracted a very high concentration of waterfowl and shorebirds

**Refuge Objectives**
- Provide resting, nesting and feeding habitat for waterfowl and other migratory birds
- Provide habitat for resident wildlife
- Restore prairie wetland ecosystem of native grass and wetlands
- Serve as educational model for land and water stewardship
- Provide public opportunities for outdoor recreation and environmental education

**Highlight**
- The refuge was designated an Important Bird Area by the Minnesota Audubon Society, one of only eight sites selected in the state

**Priorities**
- Conduct first youth waterfowl and muzzleloader deer hunts on the refuge
- Improve prairie chicken viewing opportunities
- Improve shorebird nesting sites

**Refuge Facts**
- Established: 1989
- Acres: currently 3,170
- Authorized 5,944 acres
- Inter-agency team completing private land habitat improvements adjacent to refuge
- The refuge is the culmination of a 50-year effort to protect and restore the area

**Financial Impact of Refuge**
- Two-person staff
- 5,400 visitors annually
- FY 2006 Budget: $245,000

**Refuge Office Location**
The refuge office is located one mile north-east of Audubon, Minnesota on 210th Street

**Public Use Opportunities**
- Hiking
- Environmental education
- Wildlife observation

**Contacting the Refuge**

E-mail: mike_t_murphy@fws.gov
http://midwest.fws.gov/hamdenslough
Minnesota Valley

National Wildlife Refuge Complex

Quick Facts

- The refuge is a greenbelt of large marsh areas bordered by grain terminals, highways, residential areas, office buildings and fields
- Minnesota Valley NWR and the Minnesota State Trail and Recreation Area are located along 72-miles of the Minnesota River from Ft. Snelling to Le Sueur
- Refuge lands are scattered in eight separate units
- Minnesota River Valley is a major migration corridor for waterfowl, songbirds and raptors

Refuge Objectives

- Provide resting, nesting and feeding habitat for waterfowl and other migratory birds
- Provide habitat for resident wildlife
- Protect endangered and threatened species
- Provide for biodiversity
- Provide public opportunities for outdoor recreation and environmental education

Highlight

- Nearly 11,000 inner-city schoolchildren participate in the refuge’s educational programs each year

Public Use Opportunities

- Hunting and fishing
- Environmental education and interpretation
- Wildlife observation and photography

Contacting the Refuge

Refuge Manager: Patricia Martinkovic
3815 American Blvd. East
Bloomington, MN 55425

Phone: 952-854-5900
Fax: 612-725-3279
TTY: 1-800-877-8339 (Federal Relay)
E-mail: patricia_martinkovic@fws.gov
http://midwest.fws.gov/minnesotavalley

Refuge Facts

- Established: 1976
- Acres: 12,000
- Planning to expand to 24,000 acres
- The refuge was established as a result of the effort of a local citizen group
- Includes a visitor/education center featuring an 8,000-square foot exhibit space, a 125-seat auditorium, two multipurpose classrooms, a bookstore and an observation deck
- The refuge also manages a 5,400 acre wetland management district

Financial Impact of Refuge

- 21-person staff
- 200,000 visitors annually
- FY 2006 Budget: $2.9 million

Refuge Office Location

The refuge office is located near the intersection of Interstate 494 and 34th Avenue in Bloomington, Minnesota

Priorities

- Install and maintain recreational and interpretive facilities for 200,000 yearly visitors
- Rehabilitate deteriorated and non-functioning interpretive exhibits
- Further develop environmental education programs
Northern Tallgrass Prairie
National Wildlife Refuge

Natural History
- Native prairie was originally North America’s largest ecosystem, but today it is one of the rarest and most fragmented
- Many believe the prairie ecosystem is functionally extinct
- More than 99.5 percent of the original tallgrass prairie in Minnesota and Iowa is gone
- Fragmentation of the prairie ecosystem has led to the reduction of numerous migratory songbirds, other wildlife, plants and insects
- 243 bird species rely on the remaining prairies of Minnesota and Iowa — 152 of these species breed within the refuge
- Estimates suggest that over 1,850 different species of insects live in one square meter of tallgrass prairie

Refuge Objectives
- Conserve, restore, manage and enhance the fragmented northern tallgrass prairie and aspen parkland ecosystems, and their associated native fish and wildlife populations in project area
- Develop partnerships with landowners, communities, educational institutions, local and state governments and non-profit groups that will permanently protect our nation’s biological and cultural prairie heritage

Highlight
- In Minnesota and Iowa there were originally 25 million acres of tallgrass prairie habitat. Currently, less than one percent of this prairie remains. The refuge’s goal is to permanently preserve 75,000 acres of this endangered habitat in these two states in perpetuity.

Priorities
- Restore and manage prairie landscapes in Minnesota and Iowa
- Provide advisory services to other agencies, local governments, and non-government organizations in matters relating to prairie ecology and management
- Coordinate watershed management planning

Public Use Opportunities
- Provide quality, priority wildlife-dependent recreational activities

Rice Lake
National Wildlife Refuge

Quick Facts

Refuge Facts
- Established: 1935
- Acres: 18,281
- Administers Mille Lacs NWR (.5 acre) and Sandstone Unit (2,045 acres)
- Early development of the refuge was accomplished through a resident Civilian Conservation Corps Camp

Financial Impact of Refuge
- Five person staff
- 23,000 visitors annually
- FY 2006 Budget: $679,000

Refuge Location
The refuge is located five miles south of McGregor, Minnesota, on Highway 65

Natural History
- Abundant natural food, particularly wild rice, have attracted wildlife to the area for centuries
- The refuge is noted for fall concentrations of more than 100,000 ring-necked ducks
- Refuge history centers around the 4,500-acre Rice Lake
- Native Americans continue their traditional gathering of wild rice from the lake
- Abundant songbird populations thrive in the diverse refuge habitat

Refuge Objectives
- Provide resting, nesting and feeding habitat for waterfowl and other migratory birds
- Provide habitat for resident wildlife
- Protect endangered and threatened species
- Provide for biodiversity
- Provide public opportunities for outdoor recreation and environmental education

Highlight
- 250,000 to 500,000 ring-necked ducks migrate to Rice Lake each year to feed on wild rice

Priorities
- Begin development of refuge comprehensive conservation plan
- Begin long-term white pine restoration project
- Maintenance and upkeep of interpretive kiosks, interpretive trails and public use facilities

Establishment of an environmental education program
Public recognition and expansion of refuge friends group

Public Use Opportunities
- Hiking and cross-country skiing
- Hunting and fishing
- Wildlife observation
- Auto tour route

Rydell
National Wildlife Refuge

Natural History
• Refuge is a combination of maple/basswood/oak forest, wetlands, tallgrass prairie and bogs
• At least 19 old farmsteads make up the refuge lands. Five partial log buildings remain.
• 600 acres of prairie have been restored

Highlight
• Rydell NWR provides an annual deer hunt for people with disabilities which accommodates nearly 20 hunters

Refuge Objectives
• Provide nesting, feeding and resting habitat for waterfowl and other migratory woodland and grassland birds
• Serve as a regional destination for environmental education opportunities
• Provide woodland and prairie habitat for resident wildlife
• Provide opportunities for wildlife observation and outdoor recreation

Priorities
• Increase administrative capabilities to accommodate the refuge’s rapid growth
• Continue to upgrade and improve public use facilities including parking lots, interpretive kiosks and interpretive trails
• Repair and upgrade bunkhouse

Public Use Opportunities
• Environmental education and interpretation
• Hiking, snowshoeing and cross-country skiing
• Wildlife observation and photography
• Electric golf carts available for the disabled
• Seven miles of trails, five of those are blacktop accessible
• Visitor center with bookstore

Quick Facts

Refuge Facts
• Established: 1992
• Acres: 2,120
• Refuge Friends group received “Group of the Year” award from National Friends Association in 2000

Financial Impact of Refuge
• Four-person staff
• FY 2006 Budget: $412,000
• More than 7,800 visitors a year

Refuge Location
The refuge is located three miles west of Erskine on US 2, then two miles south on county 210
Sherburne
National Wildlife Refuge

Quick Facts
- Refuge Facts
  - Established: 1965
  - Acres: 30,700
  - Administers Crane Meadows NWR
  - Supported by a large volunteer program

- Refuge Objectives
  - Provide resting, nesting and feeding habitat for waterfowl and other migratory birds
  - Provide habitat for resident wildlife
  - Protect endangered and threatened species
  - Provide for biodiversity through oak savanna restoration
  - Provide public opportunities for outdoor recreation and environmental education

Natural History
- Refuge lies in the transition zone of deciduous hardwood forest and tallgrass prairie
- Located in the St. Francis River Valley, which is known as one of the finest wildlife areas in the state
- Historic wetland, oak savanna habitat was degraded by settlement practices of fire suppression and farming
- Management emphasizes restoring the native habitat
- Important waterfowl area
- Bald eagles and sandhill cranes nest on the refuge

Highlight
- Visit the 7.3-mile Prairie’s Edge Wildlife Drive and discover the prairie, oak savanna and wetland habitats that support an astounding array of wildlife just as it may have been 150 years ago when the first settlers came to the area

Priorities
- Improve and maintain public use facilities and services to provide a quality experience to nearly 120,000 visitors a year
- Pursue the necessary funding for construction of a new visitor center
- Provide additional services directed toward wildlife observation, hunting, environmental education and nature photography

Public Use Opportunities
- Hiking and cross-country skiing
- Hunting and fishing
- Environmental education and interpretation
- Wildlife observation and photography
- Auto tour route

Refuge Location
- The refuge is located five miles west of Zimmerman, Minnesota

Financial Impact of Refuge
- 12-person permanent staff, five seasonal
- 120,000 visitors annually
- FY 2006 Budget: $1,649,000

Refuge Facts
- Established: 1965
- Acres: 30,700
- Administers Crane Meadows NWR
- Supported by a large volunteer program

Tamarac
National Wildlife Refuge

Natural History
- Refuge lies within the transition zone of deciduous hardwood forest, coniferous forests and tallgrass prairie
- Refuge has tremendous wildlife diversity due to the varied habitat
  - Waterfowl, bald eagles, loons, bear, trumpeter swans, deer, fish and songbirds reside in the refuge
- One of two refuges in Minnesota with resident gray wolf packs
- Many refuge lakes and rivers contain large beds of wild rice

Highlight
- The refuge serves as a reintroduction and reproduction site for trumpeter swans in Minnesota. Each year the refuge raises more than 40 cygnets to flight stage.

Refuge Objectives
- Provide resting, nesting and feeding habitat for waterfowl and other migratory birds
- Provide habitat for resident wildlife
- Provide public opportunities for outdoor recreation and environmental education

Priorities
- Develop a landscape level comprehensive wildlife habitat management plan
- Expand partnership work with federal, state, tribal and local agencies, NGOs and other interested parties to further wildlife management and outreach goals in the region

Financial Impact of Refuge
- Nine person staff
- 35,000 visitors annually
- FY 2006 Budget: $903,000

Refuge Facts
- Established: 1938
- Acres: 42,724 (2,180 wilderness acres)
- The majority of the refuge was logged of red and white pine between 1890-1922
- The north half of the refuge lies within the original White Earth Indian Reservation boundary
- White Earth Tribal members retain wild rice harvest and trapping privileges
- Early refuge development was started by a Civilian Conservation Corps Camp in the late 1930’s and further enhanced in the 1960’s by a Job Corps Center

Public Use Opportunities
- Hiking, hunting and fishing
- Environmental education
- Wildlife photography
- Auto tour route
- Visitor center

Contacting the Refuge

http://midwest.fws.gov/tamarac

Refuge Location
The refuge is located six miles east of Detroit Lakes, Minnesota, on Highway 34 and nine miles north on Highway 29

Quick Facts
Quick Facts

Refuge Facts
- Established: 1924
- Acres: nearly 240,000
- Refuge covers 261 miles of the Mississippi River Valley from Wabasha, Minn., to Rock Island, Ill., and is divided into four districts
- The refuge includes land owned by both the U.S. Fish and Wildlife Service and the U.S. Army Corps of Engineers in 19 counties across four states

Natural History
- Scenic river area with broad pools, braided channels, islands and bluffs rising several hundred feet
- Critical migratory bird corridor for waterfowl, songbirds and raptors
- Thousands of tundra swans are present during migration
- Over 160 active bald eagle nests and more than 4,000 nests in 13 heron rookeries
- Refuge and river support many fish species valuable for both commercial and recreational fishing
- National Scenic Byways on both sides of the refuge
- 50 percent of the world’s canvasback ducks stop on the refuge
- 40 percent of the continent’s waterfowl use the Mississippi River flyway during migration

Refuge Objectives
- Protect and preserve one of America’s premier fish and wildlife areas
- Provide habitat for migratory birds, fish, plants, resident wildlife and endangered species
- Provide interpretation, environmental education and wildlife-dependent public use opportunities
- Conserve a diversity of plant life

Refuge Facts
- Established: 1924
- Acres: nearly 240,000
- Refuge covers 261 miles of the Mississippi River Valley from Wabasha, Minn., to Rock Island, Ill., and is divided into four districts
- The refuge includes land owned by both the U.S. Fish and Wildlife Service and the U.S. Army Corps of Engineers in 19 counties across four states

Financial Impact of Refuge
- Seven-person staff at Refuge Headquarters
- 3.5 million visitors annually (refuge-wide)
- FY 2006 budget: $793,000 (headquarters) and $5 million (refuge-wide)
- Mississippi River annually contributes an estimated $1 billion in recreational benefits to the region

Refuge Office Location
The refuge office is located in downtown Winona, Minnesota

Public Use Opportunities
- Hunting, trapping and fishing
- Environmental education
- Wildlife observation
- Boating and camping

Upper Mississippi River
National Wildlife and Fish Refuge
Winona District

**Quick Facts**
- **Natural History**
  - Scenic river area with broad pools, braided channels, islands and bluffs rising several hundred feet
  - Critical migratory bird corridor for waterfowl, songbirds and raptors
  - Hundreds of bald eagles and thousands of tundra swans are present during migration
  - More than 16 active bald eagle nests and up to four active heron rookeries exist on or near the district
  - Refuge and river support many fish species valuable for both commercial and recreational fishing

- **Refuge Objectives**
  - Protect and preserve one of America’s premier fish and wildlife areas
  - Provide habitat for migratory birds, fish, plants and resident wildlife
  - Protect and enhance habitat for endangered species
  - Provide interpretation, environmental education and wildlife-oriented recreational public use opportunities
  - Conserve a diversity of plant life

- **Priorities**
  - Construct maintenance shop and office complex
  - Stabilize and restore banks along the refuge’s 50-mile river corridor
  - Continue to improve interpretation, environmental education and wildlife-oriented recreational public use facilities and services

- **Public Use Opportunities**
  - Hunting, trapping and fishing
  - Environmental education
  - Wildlife observation, photography

- **Highlight**
  - The Winona District features the newly-completed Spring Lake habitat project located in lower Pool 5 consisting of a 500-acre island complex containing a diversity of habitats to benefit fish and wildlife including turtles, marsh birds and waterfowl

**District Facts**
- Established: 1924
- Acres: 32,000
- The district covers 50 river miles from north of Nelson, Wis., south to Trempealeau, Wis.
- District covers Navigation Pools 6, 5A, 5 and Lower Pool 4

**Financial Impact of Refuge**
- Seven person staff
- 3,000,000 visitors annually (refuge-wide)
- Mississippi River annually contributes an estimated $1 billion in recreational benefits to the region
- Commercial fishing industry
- FY 2006 Budget: $690,378

**Refuge Office Location**
The refuge office is located in downtown Winona, Minnesota

Wetland Management District

Detroit Lakes

Quick Facts

District Facts
- Established: 1968
- Waterfowl Production Areas: 163 units totaling 40,678 acres
- Wetland Easements: 326 totaling 12,200 acres
- Counties in district: Becker, Clay, Mahnomen, Norman and Polk

Natural History
- Landscape dotted with thousands of small wetlands or “prairie potholes,” created by glaciers
- Prior to settlement, this area was a paradise for waterfowl, whooping cranes, bison, wolves and other prairie wildlife
- Agriculture changes to the landscape included the loss of most native prairie and the drainage of over 80 percent of the small wetlands
- The area remains a critical waterfowl production and migration area

District Objectives
- Acquire, develop and manage habitat for waterfowl production
- Provide habitat for native plants and animals, especially prairie songbirds
- Assist private landowners with restoration of wetlands and grasslands
- Provide wildlife-dependent recreation and education

Highlight
- The District is actively involved with the water management issues of the Red River Basin. District staff members are integral participants in the multi-partner efforts to address flood damages, water quality protection and improvement, and natural resources enhancement throughout the Red River Basin.

Priorities
- Acquire and restore strategically located parcels to leverage benefits for wildlife and flood damage reduction
- Strategically manage units within their landscape context to maximize habitat effectiveness
- Construct an office and public use facility to adequately serve the existing staff and visiting public with an emphasis on area students

Public Use Opportunities
- Trapping, hunting, and fishing
- Wildlife observation
- Interpretation
- Environmental education
- Volunteer Programs

District Office Location
The district office is located two miles north of Detroit Lakes, Minn., via Hwy 59, then 1-1/2 miles east on Tower Road

Financial Impact
- 29,000 visitors annually
- FY 2006 Budget: $1.3 million
- 11 person staff

Contacting the District
District Manager: Scott Kahan
26624 North Tower Road
Detroit Lakes, MN 56501-7959

Fergus Falls
Wetland Management District

Natural History
• Landscape dotted with thousands of small wetlands or “prairie potholes,” created by glaciers
• Prior to settlement, this area was a paradise for waterfowl, prairie chickens, whooping cranes, bison, wolves and other prairie wildlife
• Agriculture changes to the landscape included the loss of most native prairie and the drainage of over 80 percent of the small wetlands
• The area remains a critical waterfowl production and migration area - the highest nesting density in Minnesota was recorded here (3.5 nests per acre)

District Objectives
• Acquire, develop and manage habitat for waterfowl production
• Provide habitat for native plants and animals, especially prairie songbirds
• Assist private landowners with restoration of wetlands and grasslands
• Provide wildlife-dependent recreation and education

Priorities
• Restoring and rehabilitating prairie wetland complexes to enhance waterfowl production and migration habitat
• Expanding the prairie science class at the Prairie Wetlands Learning Center

Public Use Opportunities
• Trapping and hunting
• Wildlife observation
• Environmental education

Prairie Wetlands Learning Center
• Built through a cooperative effort between the city of Fergus Falls, the state of Minnesota and the U.S. Fish and Wildlife Service
• Promotes wetland and prairie stewardship
• Provides day and residential environmental education programs for students

Quick Facts

District Facts
- Established: 1978
- Waterfowl Production Areas: 151 units totaling 34,332 acres
- Easements: 501 totaling 11,969 acres
- Counties in district: Kandiyohi, McLeod, Meeker, Renville, Stearns, Todd and Wright

Financial Impact
- 100,000 visitors annually
- FY 2006 Budget: $1.4 million
- Staff: 14

District Office Location
The district office is located 3 miles south of Litchfield, Minn., on 615th Avenue

Natural History
- Landscape dotted with thousands of small wetlands or “prairie pot-holes,” created by glaciers
- Prior to settlement, this area was a paradise for waterfowl, prairie chickens, whooping cranes, bison, wolves and other prairie wildlife
- Agriculture changes to the landscape included the loss of most native prairie and the drainage of over 70 percent of the small wetlands
- The area remains a critical waterfowl production and migration area

District Objectives
- Acquire, develop and manage habitat for waterfowl production and other migratory birds
- Provide habitat for native plants and animals, especially endangered species
- Assist private landowners with restoration of wetlands and grasslands
- Provide wildlife-dependent recreation and education
- Improve the quality of native grasslands through the increased planting of forbs and the removal of woody vegetation

Public Use Opportunities
- Trapping
- Hunting
- Wildlife observation
- Interpretation
- Environmental education
- Wildlife photography

Highlight
- The District contains diverse native habitats, from native forest in the northeast to the tallgrass prairie in the south and west, with the transition zone in between.

Priorities
- Improve and expand capability to establish and maintain high quality wildlife habitat by restoring crop-land and low quality grasslands to native grasslands

Quick Facts

District Facts
- Established: 1964
- Waterfowl Production Areas: 246 units totaling 51,332 acres
- Wetland Easements: 646 totaling 21,117 acres
- Habitat Easements (wetland and upland): 52 totaling 3,965 acres
- FmHA easements: 4 totaling 243 acres
- District also manages four tracts totaling 243 acres of the Northern Tallgrass Prairie NWR
- Counties in district: Big Stone, Lac Qui Parle, Pope, Stevens, Swift, Traverse, Yellow Medicine and Chippewa

Financial Impact
- 47,000 visitors annually
- FY 2006 Budget: $1.4 million
- Staff: 14

District Office Location
The district office is located 3.3 miles east of Morris, Minnesota

Natural History
- Landscape dotted with thousands of small wetlands or “prairie potholes,” created by glaciers
- Prior to settlement, this area was a paradise for waterfowl, prairie chickens, whooping cranes, bison, wolves and other prairie wildlife
- Agriculture changes to the landscape included the loss of most native prairie and the drainage of over 50 percent of the small wetlands
- The area remains a critical waterfowl production and migration area - the highest nesting density in Minnesota was recorded here (3.5 nests per acre)

District Objectives
- Acquire, develop and manage habitat for waterfowl production
- Provide habitat for native plants and animals, especially prairie songbirds
- Assist private landowners with restoration of wetlands and grasslands
- Provide wildlife-dependent recreation and education

Highlight
- In 2002, the Morris WMD, Ducks Unlimited, area landowners, Big Stone County, Ortonville Elementary and the Upper Minnesota Watershed District partnered to restore a 400-acre wetland on the Centennial WPA. The basin flooded this year, hosting thousands of migratory birds.

Priorities
- Promote greater Service identity through increased environmental education and interpretation programs
- Continue to foster growth of the Morris Friends group
- Continue involvement with the DNR, The Nature Conservancy, Minnesota Prairie Chicken Society and Pheasants Forever in an effort to reestablish a greater prairie chicken population in southwestern Minnesota

Public Use Opportunities
- Hunting
- Wildlife observation
- Interpretation
- Environmental education

Quick Facts

District Facts
- Established: 1990
- Waterfowl Production Areas: 63 units totaling 12,863 acres
- Northern Tallgrass Prairie NWR: 740 acres
- Wetland/Habitat easements: 54 totaling 1,504 acres
- Counties in district: Cottonwood, Jackson, Faribault, Freeborn, Martin, Murray, Nobles, Pipestone, Watonwan, Brown, Redwood and Rock

Natural History
- Landscape dotted with thousands of small wetlands or “prairie potholes,” created by glaciers
- Prior to settlement, this area was a paradise for waterfowl, prairie chickens, whooping cranes, bison, wolves and other prairie wildlife
- Agriculture changes to the landscape included the loss of most native prairie and the drainage of over 50 percent of the small wetlands
- The area remains a critical waterfowl production and migration area

District Objectives
- Acquire, develop and manage habitat for waterfowl production
- Provide habitat for native plants and animals, especially prairie songbirds
- Assist private landowners with restoration of wetlands and grasslands
- Provide wildlife-dependent recreation and education
- Assist the state with the Heron Lake Restoration Project

Highlight
- 800-acre Touch the Sky prairie became a reality due to the cooperative efforts of Rock County, Luverne Chamber of Commerce, The Nature Conservancy, Brandenburg Foundation and the Fish and Wildlife Service with other agencies and private landowners to improve wildlife habitat in southwestern Minnesota
- Increase protection and development of waterfowl production habitat through fee title and easement program
- Increase Service identity through education and outreach

Public Use Opportunities
- Hunting
- Wildlife observation
- Interpretation and environmental education
- Visitor Center and environmental education facility co-located with District Headquarters

U.S. Fish & Wildlife Service

Minnesota
Private Lands Office

Quick Facts

Wetland Restorations
(1987-2006)
• 15,601 sites
• 65,771 acres

Upland Restorations
(1987 - 2006)
• 1,003 sites
• 34,073 acres

Overview of the Program
• Working with others to restore and enhance fish and wildlife habitat on private lands
• Restoring habitat for migratory birds, threatened and endangered species, interjurisdictional fish and other wildlife
• Restoring habitat within the watersheds of our national wildlife refuges
• Voluntary participation

Opportunities on Private Lands
• Wetland restoration
• Native prairie restoration
• Stream restoration
• Migratory bird habitat
• Endangered species habitat
• Invasive species control

Partner Involvement
• Private landowners
• Nonprofit organizations
• Corporations
• Local, state and federal agencies
• Tribal governments

Program Benefits
• Increased wildlife abundance
• Enhanced wildlife diversity
• Improved soil, water and air quality
• Increased recreational opportunities
• Broad coalition of partnerships supporting voluntary habitat restoration on private lands

Our History
For over 60 years Ecological Services has protected and restored fish, wildlife, plants and their habitats. Our roots trace back to the River Basins Program that reviewed Federal water development projects. Since 1945, Ecological Services’ responsibilities have expanded to include reviews of most Federal construction projects, endangered species, environmental contaminants, and a variety of conservation partnerships and grants.

Project Planning
Through early and wise planning we work to conserve fish and wildlife and their habitats by minimizing the impact of Federal construction projects. Besides traditional Corps of Engineers’ projects and permits, we work on energy development projects (hydro and wind power), highway projects, and proposed activities in National Forests.

Environmental Contaminants
The Environmental Contaminants program is the only program in the Federal Government solely responsible for evaluating the impact of environmental contaminants on fish and wildlife. We work to prevent, reduce and eliminate the adverse effects of environmental contaminants.

Threatened and Endangered Species
Our responsibilities under the Endangered Species Act include conserving declining species before listing is necessary, adding species to the list of threatened and endangered species, working to recover listed species, and working with other Federal agencies to ensure that their projects do not irreparably harm listed species.

Grants
We administer a number of Endangered Species Act grants to provide funding to States, Tribes, organizations, and individuals for listed species conservation activities.

Partnerships
We work to restore habitat on private lands through the Partners for Fish and Wildlife Program. We work with others to restore Great Lakes coastal habitats through our Coastal Program.

Minnesota
Fisheries Conservation

Providing Fisheries Services to Minnesota
Although there is no fishery office located in Minnesota, service in the state is provided by the Ashland Fishery Resources Office and the La Crosse Fishery Resources Office.

Ashland Fishery Resources Office
Areas Served
• Lake Superior
• Waters included in the Treaties of 1836, 1837, 1842 and 1854
• National Parks, National Wildlife Refuges and National Forests
• Private lands in eight counties of northern Minnesota

Activity Highlights
• Conservation of native lake trout, brook trout and lake sturgeon
• Aquatic habitat and wetland restoration
• Technical assistance to 14 tribal governments and 3 treaty authorities
• Surveillance and control of Eurasian ruffe
• Upper Great Lakes Coastal Program administration

Quick Facts

Office Facts
- Established: 1971
- Staff: one Special Agent
- The Duluth Field Office is administered by the St. Paul, Minn., Resident Agent in Charge Office

Law Enforcement Objectives
- Protect and conserve native and foreign wildlife through the enforcement of federal laws
- Promote and encourage voluntary compliance with federal wildlife laws through public education and the creation of a deterrent effect

Law Enforcement Priorities
- Investigate violations that have a significant impact on wild populations of federally protected species, such as those violations involving commercial exploitation and/or habitat destruction and modification
- Investigate violations that involve wild populations of species protected by state or foreign laws, with emphasis on interstate and foreign commercial exploitation
- Provide support and assistance to enforcement activities on Service lands, such as National Wildlife Refuges, and to other federal agencies on lands they manage
- Promote awareness of, and support for, federal wildlife laws and the role of law enforcement in protecting our wildlife resources and heritage

Laws Enforced
- Migratory Bird Treaty Act
- Duck Stamp Act
- Bald and Golden Eagle Protection Act
- National Wildlife Refuge Act
- Lacey Act
- Airborne Hunting Act
- Endangered Species Act
- Marine Mammal Protection Act
- Archaeological Resource Protection Act
- African Elephant Conservation Act
- Wild Bird Conservation Act

Minneapolis
Wildlife Inspection Office

Quick Facts

Office Facts
- Established: 1986
- Staff: one Wildlife Inspector
- In addition to the airport, the inspection program is responsible for seven land border ports with Canada
- The Minneapolis Wildlife Inspection program is administered by the Chicago Wildlife Inspection Office

Law Enforcement Objectives
- Protect and conserve native and foreign wildlife through the enforcement of federal laws
- Promote and encourage voluntary compliance with federal wildlife laws through public education and the creation of a deterrent effect

Law Enforcement Briefs
- Minneapolis/St. Paul Airport is both a non-designated and border port of entry for the import and export of wildlife
- The airport is the 10th largest in the United States in terms of airline operations and the 13th largest in terms of the number of passengers using the facility
- Approximately 800,000 arriving international passengers are processed annually through the port
- The airport is a significant port of entry for United States residents returning from hunting trips into Canada

Laws Enforced
- Convention on International Trade in Endangered Species (CITES)
- Endangered Species Act
- African Elephant Conservation Act
- Lacey Act
- Wild Bird Conservation Act
- Marine Mammal Protection Act
- Bald and Golden Eagle Protection Act
- Migratory Bird Treaty Act

Quick Facts

Office Facts
- Regional Office Staff: 150
- Entire Regional Staff: 1,088
- FY 2006 Regional Budget: $86 million

Assistant Regional Directors
- Administration: Christopher Jensen
- Ecological Services: Wendi Weber
- External Affairs: Jason Holm
- Fisheries: Gerry Jackson
- Law Enforcement: Mary Jane Lavin
- Migratory Birds and State Programs: John Christian
- National Wildlife Refuge System: Nita Fuller
- Special Assistant (Science): Teresa Woods

Purpose
The Regional Office provides a central headquarters to facilitate partnership, administrative, budgetary, operational, personnel and policy execution between the National Office in Washington, D.C., and field offices located throughout the region.

Organization
The Region is managed by the Regional Director with the assistance of a Deputy Regional Director, six Program Assistant Regional Directors (Budget and Administration, Ecological Services, External Affairs, Fisheries, Migratory Birds and State Programs, and the National Wildlife Refuge System), a Special Agent in Charge of Law Enforcement and a Special Assistant to the Regional Director for Partnerships.

**Quick Facts**

**Habitat Accomplishments**
- Over 165,000 acres of habitat protected, restored and enhanced
- Seeded retired cropland to native grasses
- Protected floodplain and stream habitat

**Financial Assistance**
- Matching dollars from partners totaling over $58.9 million
- North American Wetland Conservation Act grants; 44 grants totaling over $18.7 million

**About the Plan**
- An international agreement signed in 1986
- Goal: return waterfowl populations to levels of the mid 1970’s
- Achieve goal by restoring and protecting wetland and grassland habitat
- Includes 13 habitat joint ventures and three species joint ventures in the U.S., Canada and Mexico

**Partner Involvement**
- Private landowners
- Nonprofit organizations
- Corporations
- Local, state and federal government agencies
- Tribal governments

**Minnesota Projects**
- Wetland and grassland restorations within:
  - Northern Tallgrass Prairie, phase III
  - Great River Corridor
  - Centennial Pothole Venture
  - Comprehensive Bird Conservation — Red River of the North Watershed
  - Federal, state and county lands

Federal Assistance

U.S. Fish & Wildlife Service

Minnesota

Federal Assistance

How the Dollars are Administered
- The goal of the Federal Assistance Program is to work with States to conserve, protect, and enhance fish, wildlife, their habitats and the hunting, sportfishing, and recreational boating opportunities they provide.
- In fiscal year 2006 total grant funds in the Midwest Region exceeded $153 million. Minnesota received $23 million. These monies were distributed through programs such as: Sportfish and Wildlife Restoration, Coastal Wetlands Program, Landowner Incentive Program, Section 6 of the Endangered Species Act, Boating Infrastructure Grant Program, State Wildlife Grants and the Clean Vessel Act Program.

What the Money Can be Used For
Fish and wildlife research, habitat enhancement, assistance to private landowners, environmental review of public projects, land acquisition, operation and maintenance of lands and facilities, boating and angler access improvements, comprehensive planning for fish and wildlife resources, and hunter and aquatic education.

United States
- Over 82 million U.S. residents 16 years old and older fished, hunted, or wildlife watched in 2001.
- Sportspersons spent a total of $70 billion in 2001—$36 billion on fishing, $21 billion on hunting, and $14 billion on items used for both hunting and fishing (the sum of expenditures totals $71 billion due to rounding).

Where Can I Find More Information
Detailed grant information is available at our public website—faims.fws.gov.

http://fa.r9.fws.gov/surveys/surveys.html
Quick Facts
- 1.4 million bird watching participants
- 140 million bird watching days
- More than 87,000 duck hunters
- One Important Bird Areas on U.S. Fish and Wildlife Service lands in Minnesota: Minnesota Valley NWR

Inventory and Monitoring
- Waterfowl Breeding Pair Survey
- Four Square-Mile Breeding Duck Survey
- Resident Canada goose breeding population survey
- Woodcock Singing Ground Survey
- Mourning Dove Call Count Survey
- Mid-Winter Waterfowl Survey
- Waterfowl Banding Program
- Great Lakes Colonial Waterbird Survey
- Minnesota Breeding Bird Atlas

Research
- Golden-winged warbler research at Tamarac National Wildlife Refuge
- Delineation of restorable wetlands in the prairie pothole region
- Identification of sites well suited for conservation provisions of the Farm Bill
- Study of post-fledgling habitat use of early-successional forests by songbirds

Management
- Wetland and grassland protection, restoration and enhancement
- Bottomland hardwood restoration
- Develop hunting regulations
- Issue migratory bird permits
- Integrated bird conservation planning at the state and Bird Conservation Region levels

Outreach
- International Migratory Bird Day
- Junior Duck Stamp Contest
- Prairie Wetlands Learning Center

Partnerships
- Minnesota Department of Natural Resources
- Minnesota Cooperative Fish and Wildlife Research Unit (U.S.G.S.)
- University of Minnesota
- Ducks Unlimited
- Partners in Flight
- North American Waterfowl Management Plan
- U.S. Shorebird Conservation Plan
- North American Waterbird Conservation Plan
- Audubon Minnesota
