Blooms and Blossoms Beckon Butterflies and Bees to
Joseph Charter School's *Magic Pollinator Garden*!

Who is Pollinating the Joseph Charter School Garden?
Pollinator: Butterfly
Oregon Sunshine
Antelope Bitterbrush
Pollinator: Moth
Pollinator: Hummingbird
Blue Mountain Penstemon
Goldenrod
Pollinator: Fly
Pollinator: Wind
Idaho Fescue
Lavender
Pollinator: Bee
See if you can spot these pollinators or their favorite plants in this garden.
Pollinators – bees, hummingbirds, flies, moths, butterflies, beetles, and wasps move pollen from one flower to another flower of the same species, helping plants to produce fertile seeds. Wind is also a pollinator for grasses and other plants.
Joseph Charter School
Pollinator Garden
Joseph Charter School (JCS) Pollinator Garden is part of a schoolyard habitat and outdoor classroom program. It is a school garden composed primarily of native plants established to get students, parents, teachers, and community members outside learning about native plants and pollinators.
Other components of the JCS schoolyard habitat and outdoor classroom program include bluebird nest box installation on school grounds, monitoring and associated lessons, pollinator garden lessons developed, and outdoor benches installed on school grounds to get students and teachers outside learning about their natural resources and general education.
The original vegetable garden (Magic Garden) and fence were provided by Wallowa Resources and the Joseph United Methodist Church.
Pollinator garden funding has been provided by JCS and the U.S. Fish and Wildlife Service (USFWS). These funds were through the Partners for Fish and Wildlife and the Connecting People with Nature Programs. Partners for this project include USFWS, JCS, Oregon Parks and Recreation Department (OPRD), U.S. Forest Service, Wallowa Resources, teachers, parents, local community businesses, and volunteers.
