About Disability Access Consultants

Disability Access Consultants (DAC) offers a full range of accessibility services to comply with the requirements of mandated and recommended services for individuals with disabilities in accordance with federal and state laws and regulations.

DAC was formed in 1998 to assist public entities in compliance with the Americans with Disabilities Act, and related accessibility requirements, regulations and standards, and expanded to assist businesses with regulation compliance. DAC provides nationwide services to our customers.

DAC has earned a reputation for providing low cost, effective barrier removal solutions in an easy to use format and has performed over 12,000 facility inspections for compliance during our 14 years in business.

Regardless of where you are in your compliance process, DAC has a customized solution to develop a compliance plan for success. DAC services include:

- Facility Inspections
- Self-Evaluations
- Policy Review and Development
- Transition Plans
- Public Rights-of-Way
- Consultation
- Accessibility Compliance Software – DACTrak
- Training on DACTrak software and PC Tablet
- Training on Federal ADA and State Standards
- Expert Witness Service
- Plan Reviews
- Plan Implementation

Inspections by Accessibility Standards:

- ADA 2010 Standards
- ADA-ABA
- UFAS
- ANSI
- Section 504 of the Rehabilitation Act
- Outdoor Developed and Recreational Areas
- NPSI Playground Safety Inspections
- PROWAG - Federal Public Rights of Way Guidelines
- Federal Highway Administration's Manual on Uniform Traffic Control Devices (MUTCD)
- Passenger Vessel Accessibility Guidelines

DACTrak

DAC can complete your facility inspections or you can license DACTrak to complete your own inspections

Our Accessibility Survey Report provides much more than just a listing of items that are out of compliance. Knowing how to bring the item into compliance is important. Understanding which requirement you must meet (federal, state or other) is critical to your compliance efforts. Add the ability to have estimated and actual costs and photographs for each item and you begin to have a realistic plan that is easy to manage.

Policies Review and Development

DAC can review and assist in development of written policies and operating procedures, administrative regulations and informal practices to ensure that individuals with disabilities are not subject to discrimination.

Easy...Mobile...Accurate...Concise...Reliable...Secure...“Green”

**The easy, quick and concise method to capture field data,
prepare reports and manage information**

DACTrak

DAC provides industry leading software technology for automated inspections. Our cutting edge application runs on a Tablet PC for data collection and then transmits that data for automatic processing via the web.

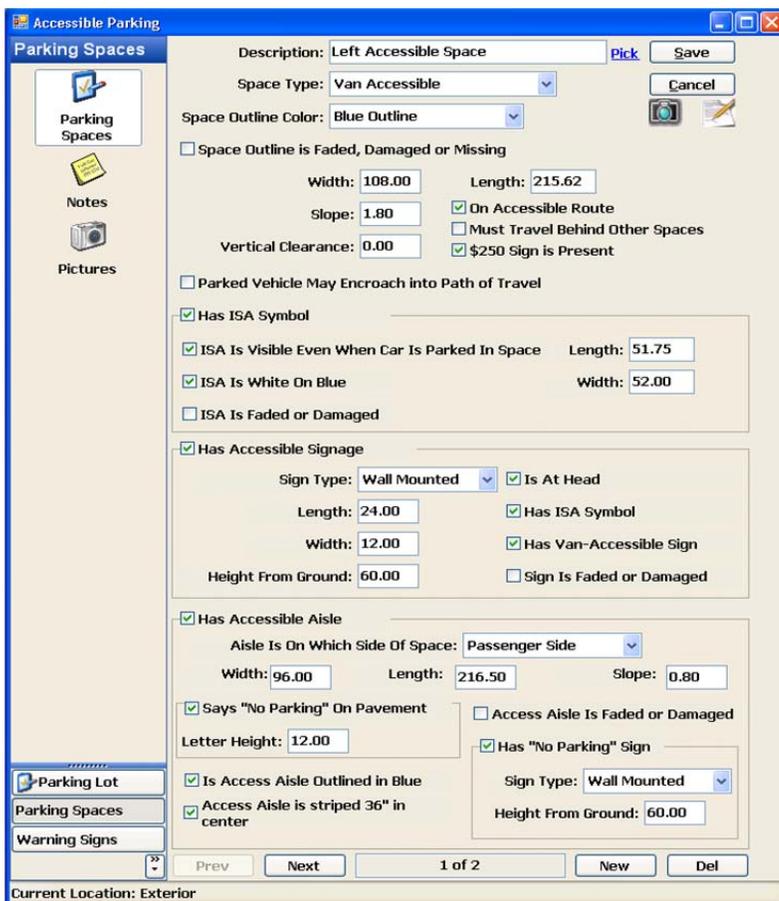

Information and measurements entered into the tablet are automatically processed into a report. Our web based system allows for easy data management, updating and customization.

Results from inspections are processed wirelessly into a report and can be obtained seconds after the data is collected and uploaded from the Tablet PC.

What sets DACTrak apart from other inspection tools? DACTrak is intelligent. No longer will you have to compare federal and state accessibility codes and standards as DACTrak does the comparison automatically without paper checklists.

Data Collection

The screenshot shows the 'Accessible Parking' software interface. The main window is titled 'Accessible Parking' and has a sidebar on the left with icons for 'Parking Spaces', 'Notes', and 'Pictures'. The main area is a form for 'Parking Spaces'. The form has several sections:

- Description:** Left Accessible Space (with 'Pick' and 'Save' buttons).
- Space Type:** Van Accessible (dropdown menu).
- Space Outline Color:** Blue Outline (dropdown menu).
- Space Outline is Faded, Damaged or Missing
- Dimensions:** Width: 108.00, Length: 215.62, Slope: 1.80, Vertical Clearance: 0.00.
- Parked Vehicle May Encroach into Path of Travel
- On Accessible Route
- Must Travel Behind Other Spaces
- \$250 Sign is Present
- Has ISA Symbol
- ISA Is Visible Even When Car Is Parked In Space (Length: 51.75)
- ISA Is White On Blue (Width: 52.00)
- ISA Is Faded or Damaged
- Has Accessible Signage
 - Sign Type: Wall Mounted (dropdown)
 - Is At Head
 - Length: 24.00, Width: 12.00, Height From Ground: 60.00
 - Has ISA Symbol
 - Has Van-Accessible Sign
 - Sign Is Faded or Damaged
- Has Accessible Aisle
 - Aisle Is On Which Side Of Space: Passenger Side (dropdown)
 - Width: 96.00, Length: 216.50, Slope: 0.80
 - Says "No Parking" On Pavement (Letter Height: 12.00)
 - Access Aisle Is Faded or Damaged
 - Has "No Parking" Sign
 - Sign Type: Wall Mounted (dropdown)
 - Height From Ground: 60.00
 - Is Access Aisle Outlined in Blue
 - Access Aisle is striped 36" in center

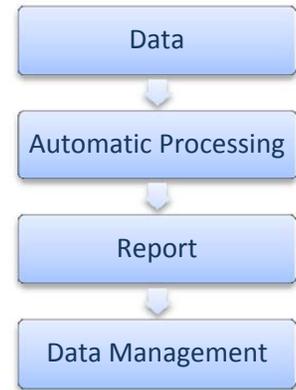

At the bottom, there are navigation buttons: 'Prev', 'Next', '1 of 2', 'New', and 'Del'. The status bar at the very bottom says 'Current Location: Exterior'.

- Data collection can be performed by a DAC inspector, your staff member, or an individual or firm.
- Data is collected using a DAC Tablet PC or the client can use their own Tablet PC with DACTrak installed.
- Data is entered into the tablet as the inspection occurs, eliminating the need to transfer data collected on paper forms.
- As many photos as you want can be taken to document the findings and information collected in the field. Photos are linked to the findings, automatically merge into the software from the tablet and are viewable on the reports.
- The handwriting recognition technology makes it easy for anyone to enter data into the forms.
- DACTrak allows data to be collected offline. The user easily exports all data in a single send request once an internet connection is established.
- Integrated Web Cam Drivers are installed within the software to support built-in and most USB cameras.

DACTrak's unparalleled ease of data entry puts DACTrak in a category of its own for inspection technology, reporting and data management.

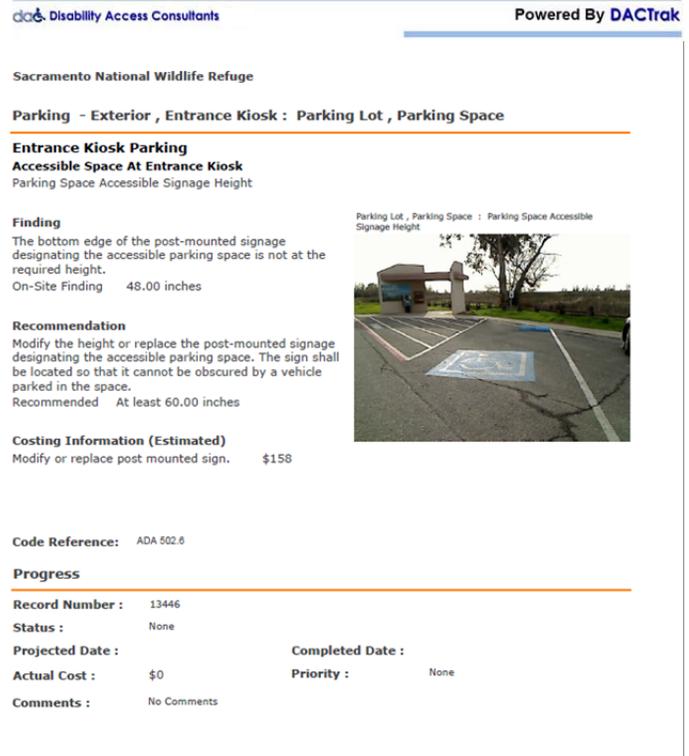

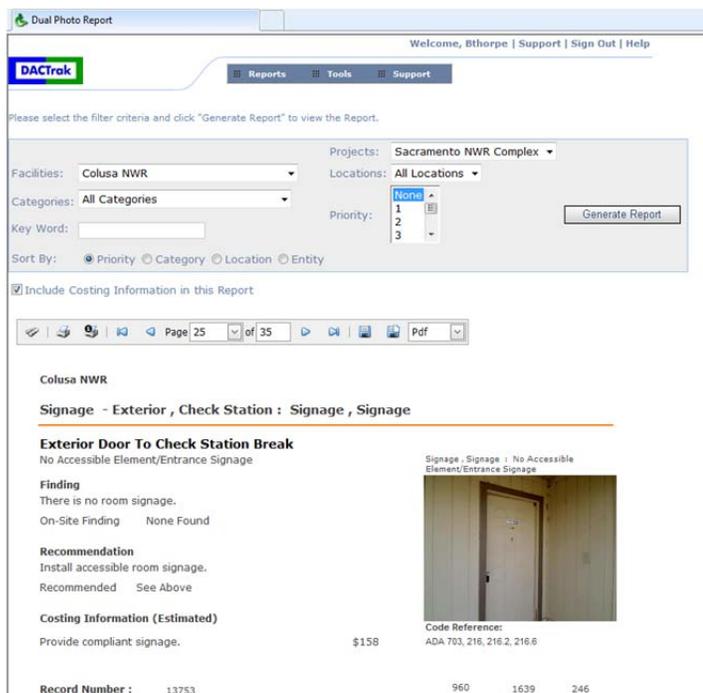

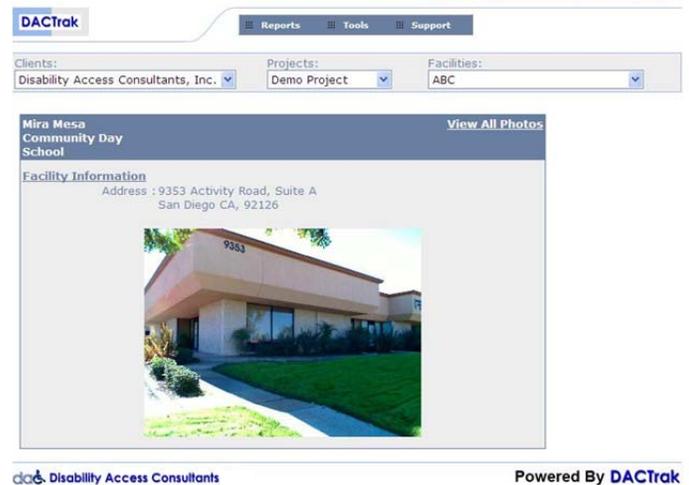

Processing

- Data stored in DACTrak can be easily updated and reprocessed using new information if regulations change.
- There are no programs to install or configure. DACTrak utilizes web services to receive data from the Tablet PC and pass it to MSMQs (Microsoft Message Queues) to be processed by Windows Services against a Microsoft SQL Database.
- Within seconds processing is completed and users can access the secure web site to view reports.

Reporting

- DACTrak's reporting software is smart and comprehensive. The inspector does not have to be an expert in accessibility, as help menus are available on the tablet to assist in data acquisition and training. The program will evaluate all measurements, determine findings and create reports for you.
- Our intelligent processing engines use the standards selected along with our extensive knowledgebase to process results immediately.

Data Management

- Powerful data management features in DACTrak allow for easy and accurate data reporting.
 - Manage progress
 - Set projected completion dates
 - Assign priorities
 - Update cost estimates, which can be revised with actual costs
 - Enter additional notes and comments
- Reports can be created in many file storage formats for printing or for emailing to adhere to environmentally friendly Green standards.
- Users can be assigned degrees of access to DACTrak.com to allow view-only or record updating capabilities.
- DACTrak is easily updated individually or globally by users with appropriate permissions.

Element Description	Finding	Progress	Projected Completion Date	Actual Completion Date
Conference Room 10	The clear opening width of the door is less than 32 inches.	Completed	8/7/2008	7/2/2008
Conference Room 10	The vertical clearance height of the door is less than 80 inches.	Not Started	8/7/2008	
Conference Room 10	There is not enough clear floor space provided at the push side of the door.	Not Started	8/7/2008	
Conference Room 10	There is no level landing at this door.	Not Started	8/7/2008	
Conference Room 10	There is not enough clear floor space provided at the pull side of the door.	In Progress	8/7/2008	
Conference Room 10	There is no level landing at this door.	Not Started	8/7/2008	
Conference Room 10	There is less than 18 inches of latch side clearance on the pull side of the door.	Not Started	8/7/2008	
Conference Room 10	The height of the threshold at the entrance door is greater than 1/2 inch.	Not Started	8/7/2008	
Conference Room 10	The door opening hardware is not accessible.	In Progress	8/7/2008	
Conference Room 10	The door opening force for this door is greater than 5 pounds.	In Progress	8/7/2008

New Comment: Sent to ABC Contractors; Purchase Order # 2067

Reviewing your completed report is as simple as logging onto DACTrak via your web browser. You can see your results instantly from anywhere you are.

With DACTrak, reports are quick and easy to prepare, manage and print.

Clients can utilize a pre-formatted report, or easily customize their own report.

Power and Security

The real power of DACTrak is behind the scenes. Once the field inspector has completed the site inspection using the Tablet PC, the inspector submits the inspection information wirelessly with a touch of a button to DACTrak via the internet.

Here is where the processing power and the simplicity all come together. The DACTrak processing engine takes the submitted data and evaluates it against a compiled list of rules and regulations for your industry. These rules and regulations are updated regularly so you can review your compliance any time rules and regulations are updated or revised.

All data is backed up daily and kept safe on our secure servers. Our servers are hosted in an enterprise class secure datacenter with 24/7 video monitoring and biometric access control.

DACTrak is hosted using redundant enterprise class Load Balancers, Web Servers, Processing Servers and Database

Servers in a VM environment. DAC provides a high level of data security and integrity. All data is backed up daily and archives are vaulted. Even if you are not finished with your site, your data is collected and safeguarded.

Environmentally Friendly “Green” Reports

DACTrak reports can be viewed via your internet browser at any time, eliminating the need to continuously print your reports. Additionally, DACTrak reports can be easily exported into many file storage formats. These reports can be saved for offline viewing or distributing via email, potentially saving thousands of printed sheets of paper.

Updates

DACTrak’s powerful rules engine can be updated seamlessly when new standards are adopted. Facilities can then be reprocessed to see which findings are compliant or not compliant with the new standards.

Customization

Depending on the client’s needs, DACTrak can be used to inspect for compliance with different federal or state standards. Facilities can be inspected for compliance with standards such as ADA 2010 Standards, ABAAS, ADA-ABA, UFAS, ANSI or state standards and requirements. In addition, DACTrak can be easily customized by our in-house IT team to inspect for related items an individual client may want to collect and manage. Integrating photos in the DACTrak software is an excellent way to view building conditions while inspecting for accessibility compliance as well as collect other information that may be valuable for an individual client. DACTrak may also be customized to interface with a client’s existing software.

Consistency and Integrity

Get accurate, consistent results every time. DACTrak helps ensure that every site or location is inspected with the same consistent method, removing interpretation often required by the inspector. The DACTrak software requires the user to complete information needed to inspect the accessibility item or element and does not allow the user to continue without entering the data requested.

DACTrak Provides More than Accessibility Information

Other Value Added Components of DACTrak

- Photographs and notes of items other than accessibility
- Safety conditions
- Condition assessment of other features of the facility
- Photographs of additional items or areas
- Information regarding potential sites to lease or purchase
- Remote viewing - capture photos onsite that can be viewed remotely offsite

ADA is Everyone's Business

DAC has experience with assisting all types of industries, from independent and retail shops to international fast food chains, schools, cities, counties and federal government sites. DAC has provided solutions with sound advice, action and peace of mind.

DAC has developed thousands of compliance plans for our clients, who represent a diverse array of public entities, businesses and government entities.

Types of Facilities

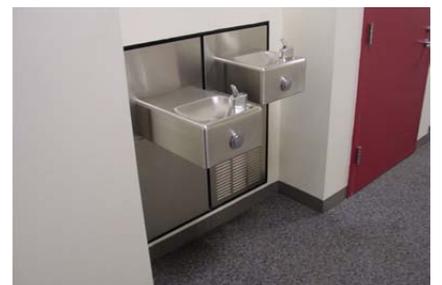

- Office Buildings
- Federal Buildings
- Public Buildings
- Post Offices
- Schools
- Colleges
- Libraries
- Jails
- Courts
- Municipal Buildings
- Hospitals
- Restaurants
- Hotels
- Resorts and Timeshares
- Gas Stations
- Parks and Recreation
- Camp Grounds
- RV Parks
- Golf Courses
- Retail Stores
- Shopping Malls
- Wineries
- Banks
- Theaters
- Sidewalks and Intersections
- Department of Motor Vehicles
- Public Transportation Systems
- Railroads
- Sports Facilities
- Auditoriums
- Spectator Arenas and Amphitheatres
- Cruise Lines
- Museums
- And more...

Depending upon the needs of the client or type of inspection, the accessibility standard to be used for the inspection is selected, such as:

- ADA 2010
- ABAAS
- UFAS
- ANSI
- Outdoor Developed Areas
- Playground Safety Inspections

Inspections can be customized to collect information for sites that are currently leased or may be leased.
