

Qualified surveyors list
(updated 5/18/2012)

This list is compiled by the Panama City Field Office of the U.S. Fish and Wildlife Service and represents individuals who are qualified to conduct surveys for federally listed freshwater mussels in the Escambia, Yellow, and Choctawhatchee river drainages in Alabama and Florida, and/or the Econfina, Apalachicola, Ochlockonee, and Suwannee river drainages in Georgia and Florida. Inclusion of names on this list does not constitute endorsement by the U.S. Fish and Wildlife Service.

Surveys must follow the Freshwater Mussel Survey Protocol for the Southeastern Atlantic Slope and Northeastern Gulf Drainages in Florida and Georgia which can be accessed on our website: <http://www.fws.gov/panamacity/mussels>. If the survey determines that any listed species are present, contact this office to allow us the opportunity to work with you to ensure that a project avoids or minimizes adverse effects to rare species and their habitats. For projects in Alabama, contact the Alabama Ecological Services Field Office in Daphne, and for projects in Georgia, contact the Georgia Ecological Services Field Office in Athens.
