AFES/MMM

JAN 29 2010

Mr. Erik Opstad
Alaska Operations Manager
Savant Alaska, LLC
P.O. Box 112212
Anchorage, Alaska 99516

Dear Mr. Opstad:

This responds to the letter Savant Alaska, LLC (Savant) submitted to the U.S. Fish and Wildlife Service (Service) dated June 25, 2009, requesting a Letter of Authorization for the incidental take of polar bears and Pacific walrus for the Badami Unit Redevelopment Project (BURP).

Enclosed is a LOA (10-07) that allows Savant to take small numbers of polar bears and Pacific walrus incidental to oil and gas industry exploration activities at the above location identified in your LOA request. The proposed start date for this project is late November 2007. The BURP exploration program has 2 components:

1. construction of a tundra ice road (approximately 26 miles), beginning from the Endicott Causeway in the Duck Island Oilfield Unit to the Badami facility, to support the mobilization, drilling, and demobilization of the drill rig for exploration activities; and
2. seasonal barging activities between West Dock in the Prudhoe Bay Unit and Badami in support of exploration activities.

If any changes develop in your project during the 2009-10 winter season, such as activities or location, please notify the Marine Mammals Management Office (MMM) prior to the planned operation. This would allow us to evaluate the activity and, if appropriate, amend your LOA.

Protection measures for polar bears described in the Savant polar bear interaction plan (Polar Bear and Grizzly Bear Awareness and Interaction Plan, Badami Unit Redevelopment Project, June 2009), Savant personnel can limit human/polar bear interactions by being observant of approaching animals (i.e., the use of marine mammal observers) and breaking off interactions, if practicable, by allowing the animals to continue their travel. All terms of the Savant Polar Bear Interaction Plan are incorporated by reference and full implementation is expected. Service

TAKE PRIDE
IN AMERICA 

biologists are available for consultation if questions or concerns arise regarding polar bears and walrus during the project period at the phone numbers listed below and noted in your interaction plan.

Historical polar bear denning activity reveals that some creek cutbanks and river bluffs provide suitable denning habitat for polar bears, especially in and around the larger, braided rivers, such as the Sagavanirktok River delta and its adjacent drainages. Activities, such as ice road construction, including the use of ice chipping areas and placement of drill pads, occurring in areas near preferred denning habitat may encounter denning polar bears. Disturbance during denning could lead to abandonment of dens and possible mortality to cubs. The Service seeks to limit disturbance to maternal polar bear den sites, both known dens and those areas that could possibly be preferred by denning polar bears. With this in mind, use caution when operating near these areas, such as the river crossings on the tundra ice road, during the maternal denning period (mid November to mid April). Furthermore, Savant will provide copies of the polar bear observation form to all Savant contractors operating under the LOA. Report any polar bear sightings, or signs of polar bears (tracks, scat, or diggings) to this office by phone or using the polar bear observation form. Report any possible den locations that are found during work activities immediately to our office

As a precondition to the Savant LOA, on December 7, 2009, a FLIR (Forward Looking Infrared) survey flight was conducted in the Sagavanirktok River delta and along the river crossings of the tundra ice road used to access the BURP Project area. The FLIR survey investigated den habitat within a 1-mile envelope along the river crossings of the ice road route to identify any potential polar bear dens within those portions of the travel corridor. No polar bear dens were identified during this survey within the defined survey area.

Furthermore, in accordance with section 7 of the Endangered Species Act of 1973, as amended (ESA), issuance of this LOA also fulfills the requirements for Tier 2 Consultation of the Programmatic Biological Opinion for the activities described herein. In the "Programmatic Biological Opinion for Polar Bears (*Ursus maritimus*) on Beaufort Sea Incidental Take Regulations" (June 2008; Tier 1 BO), the Service determined that the total take anticipated as a result of the issuance of the Regulations is not likely to result in jeopardy to the polar bear, in accordance with section 7 of the ESA. In order for the Tier 2 BO to be consistent with the "no jeopardy" conclusion of the Tier 1 BO and for an ESA incidental take statement (ITS) to be provided: (1) the proposed activity must provide the required information, as described in §18.124 of the Regulations, (2) the LOA must include any mitigation measures that the MMM believes appropriate for the specific activity and location, as described in §18.128 of the Regulations, and (3) the MMM must determine that the incidental take for the specific activity will be consistent with the negligible impact finding for the total take allowed under the Regulations.

Reasonable and prudent mitigation measures, as well as implementing terms and conditions were included for MMM in the Tier 1 BO and have been incorporated into the LOA process. Issuance of this ITS with the LOA completes ESA requirements for authorization of incidental take of the

polar bear. Compliance with the terms and conditions of this LOA insures that the LOA holder is also in compliance with the ESA.

An additional requirement of this LOA is for Savant to provide observational data of polar bears throughout the project and a complete report of all observations at the conclusion of the project to document take. This final report will be provided to the MMM. This report meets the tracking and reporting requirements relative to the documentation of take as required by the MMPA and the ESA.

This authorization is issued in accordance with our regulations listed at 71 FR 43926, dated August 2, 2006. Please review these regulations. Should you have any further questions contact Mr. Craig Perham of our Marine Mammals Management Office at (907) 786-3800 or 786-3810.

Sincerely,

Rosa Meehan, Ph.D.
Chief, Marine Mammals Management

ISSUED: January 29, 2010

EXPIRES: January 20, 2011

LETTER OF AUTHORIZATION (10-07)

Savant Alaska, LLC (Savant) is hereby authorized to take small numbers of polar bears and Pacific walrus incidental to activities occurring during the Badami Unit Redevelopment Project (BURP). This also includes contractors of Savant performing Savant-approved work under the scope of operations to be conducted. BURP activities authorized under this letter include, but are not limited to:

1. construction of a tundra ice road (approximately 26 miles), beginning from the Endicott Causeway in the Duck Island Oilfield Unit to the Badami facility, to support the mobilization, drilling, and demobilization of the drill rig for exploration activities; and
2. seasonal barging activities between West Dock in the Prudhoe Bay Unit and Badami in support of exploration activities.

These activities are discussed in detail in the, "Authorization for Incidental Take of Polar bears and Pacific Walrus, Badami Unit Redevelopment Project, Onshore Mikkelsen Bay, Alaska, Savant Alaska, LLC," dated June 25, 2009.

This authorization and the required conditions below include contractors of Savant performing Savant-approved work under the scope of operations to be conducted. Authorization is subject to the following conditions:

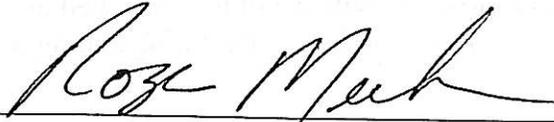

1. The Savant polar bear interaction plan (Polar Bear and Grizzly Bear Awareness and Interaction Plan, Badami Unit Redevelopment Project, June 2009) and the Savant interaction addendum (USFW&S Coastal Operating Requirements – Endicott to Canning R., Issue Date: January 6, 2010) are approved and all provisions of these documents must be complied with unless specifically noted otherwise in this Letter of Authorization. A copy of this polar bear interaction plan and addendum must be available on site for all personnel.

TAKE PRIDE
IN AMERICA 

2. Savant Operations Managers, or their designates, will be fully aware, understand, and capable of implementing the conditions of this authorization.
3. Intentional take is prohibited under this authorization.
4. This authorization is valid only for those activities identified in the request for a Letter of Authorization dated June 25, 2009.
5. Polar bear monitoring, reporting, and survey activities will be conducted in accordance with 50 CFR 18, section 18.128. The basic monitoring and reporting requirements follow:
 - Savant must cooperate with the Service, and other designated Federal, State, or local agencies to monitor the impacts of oil and gas exploration activities on polar bears;
 - Savant must not conduct activities that operate nor pass within 1 mile of known polar bear dens, and all observed dens must be reported to the Marine Mammals Management Office, Fish and Wildlife Service immediately upon discovery. Should occupied dens be identified within one mile of activities, work within a one-mile area will cease and Service must be contacted for guidance. The Service will evaluate these instances on a case-by-case basis to determine the appropriate action. Potential actions may range from cessation or modification of work to conducting additional monitoring, and Savant must comply with any additional measures specified.
 - Savant must designate a qualified individual or individuals to observe, record, and report the effects of the activity on polar bears to the Service within 24 hours of visual observation;
 - Savant must allow the Service to place an observer on the site to monitor the impacts of the activity on polar bears, at the discretion of the Service;
 - Savant must submit an annual monitoring report to the Marine Mammals Management Office as required under 18 CFR 18.128(f), which will be received up to 90 days after the expiration date of the LOA.
6. Per the "Programmatic Biological Opinion for the Beaufort Sea Incidental Take Regulations for Polar Bear (June 2008)", your request also triggers the second of the two-tiered programmatic process. In order for incidental take of the polar bear to be exempted from the prohibitions of the ESA, the LOA also serves as an "Incidental Take Statement" (ITS), required under section 7 of the Endangered

Species Act of 1973 (ESA). Issuance of the LOA/ITS fulfills the requirements for Tier 2 Consultation of the Programmatic Biological Opinion for the activities described in this letter.

7. This LOA is valid from the date of issuance to January 20, 2011.

Chief, Marine Mammals Management
