Hi Dan,

Attached is the map package for the wildlife and habitats map as well as a screen shot for the wetland layers (there are two, though I cannot see a difference) from the wadnr habitat mapper and a link: <http://wadnr.maps.arcgis.com/apps/webappviewer/index.html?id=5cf9e5b22f584ad7a4e2aebc63c47bda>) Sorry, this was something I asked Julie to look in to so, I'm not sure what the additional layers are that she has imported into the map in the package.

Also, I was unable to package the regular map because the link is broken on the key pieces for the aquaculture plot. I've tried tinkering with it, but I can't figure it out quickly and I really have to get back to reading all of the materials they gave us yesterday. Can you help when you return?

Thanks for your help!
Sue
