Hi Gerry

FYI

This revised manuscript and analysis of our owl /ASSP/ mouse work is being submitted to Ecological Applications

Subject: ASSP 3 Spp MS revised!

hi all,

thanks to all of your for edits and comments.

I have gone through the MS making final revisions, formatting it for Ecological Applications; the MS is 58 pages and maximum is 60.

I also reformatted the Online Appendices as required by Ecological Applications.

So, there are 4 documents: the main MS (which they want as Word file), and the 3 Online Appendices as pdfs. see attached.

However, I cannot submit it right now because the website is down, or at least not fully functional.

So, as soon as it is back up (which may take a day) I will submit.

Unfortunately MSS must be submitted through the online website, and it won't let me get on, etc. but am sure it will be resolved soon.

In the meantime, have pleasant reading.

Thanks for everyone's help.

cheers,

Nadav
