Subject: extended sally survey boards on the outer marine terrace
Date: Monday, November 2, 2015 11:21:39 AM
Importance: High

Hi Gerry

A quick question on sally board and pinniped census. As we begin all island monthly census checks, Jim and I are for the time being, of the mind to not check all boards south of the cart path trail to reduce pinniped disturbance. Do you agree? Checking and even trying to track down all those boards in the zalophus maze (which have always been empty..) would cause a ton of take. What about outer shubrick line as well if that would cause excessive pinniped take? That could likely be done at a time when the pinnipeds have moved out. Doubt you would every get that on the terrace under current conditions.

Thanks for the input and Jim and Ryan please add any of your comments as well.

Russ
