Gerry:

Thanks for completing your comments on the partner Draft EIS last week. Gabrielle and I will be incorporating your comments and edits.

Now I'm trying to ensure that all the Appendices are getting written, reviewed and revised in time to go into the Administrative Draft on time.

We can't miss this next deadline, or else a 2013 implementation will not be possible, which could put more petrels and project funding at risk.

Appendices and report review deadlines will need to be met each week as we head into crunch time for getting the Agency document out.

So, the first thing to be done is make sure that Russ has all of our edits and comments on the latest version of the ***Western Gull PVA*** and the ***Petrel/mouse/owl model*** (attached). The models seem fine to me, but the language of the report is not very clear or lay-friendly, and so some word-crafting is necessary so the main points and results are understandable. **Could you get your comments on the two reports to Russ by next Monday, Sept. 24, so he and Nadav have time to revise them and get into the Admin Draft EIS in October?**

Thanks,

Dan[attachment "DG-comments-WEGU_PVA_Final_5_31_12.docx" deleted by Gerry McChesney/SFBAY/R1/FWS/DOI] [attachment "ASSP BUOW Modeling Draft_8jun2012.docx" deleted by Gerry McChesney/SFBAY/R1/FWS/DOI]
