

RECOGNIZED QUALIFIED INDIANA BAT/NORTHERN LONG-EARED BAT SURVEYORS

The following list includes individuals recognized by the U.S. Fish and Wildlife Service, New Jersey Field Office, and the New Jersey Department of Environmental Protection (NJDEP) Endangered and Nongame Species Program as qualified to conduct surveys for Indiana bats and northern long-eared bats. This list may not include all individuals qualified to survey for this species. This list will be updated periodically. Inclusion of names on this list does not constitute endorsement by the Service, the NJDEP, or any other U.S. Government agency or State agency.

Various techniques are used to sample and study bats in New Jersey (including hibernacula surveys, mist netting, acoustic detection, and radio telemetry) and some surveyors on this list may not be qualified to conduct all techniques. Surveyors qualified to conduct only habitat assessments (Phase I) and acoustic surveys (Phase II) are marked with an asterisk (*) to differentiate them from surveyors qualified to conduct trapping efforts. A scientific collecting permit from the NJDEP is required to capture bats in New Jersey.
