Seney

National Wildlife Refuge

2022 closures and opportunities at Seney National Wildlife Refuge

Seney National Wildlife Refuge was fortunate enough to be one of the recipients of the Great American Outdoor Act Funds. These funds will allow us to complete much needed work on several refuge structures which have been on a maintenance backlog.

Funding will go to four big projects:

- 1. New combined Visitor and Headquarters building
- 2. Marshland Wildlife Drive and Fishing Loop Bridge and Water Control Structure Repairs
- 3. Show Pool Site Rehabilitation and Improvements
- 4. Pine Ridge Nature Trail Improvement Project

The largest portion of the project effects the current visitor center, office, and the campus surrounding these buildings. As part of this process the two buildings were evaluated to see if they could be renovated to meet the needs of the station. During this process it was determined the best path forward was to demolish the current structures and build a new combined building. The old visitor center was demolished this winter and a contract will soon be awarded for the construction of a new visitor center/headquarters, to be built in the same location. In the meantime, we are adapting our existing facilities to temporarily house the visitor center and headquarters offices.

Temporary Visitor Center

River Road Quarters is usually home to our temporary summer staff. This year we are repurposing the building to serve as our temporary visitor center.

Location

1986 Manistique River Road/County Road 436. About 6 miles south of the Refuge Entrance Road

Dates

Open Tuesday, May 17, 2022 to October 20, 2022

Open Hours

Tuesday - Saturday, 9:00 a.m. - 4:00 p.m.

Marshland Wildlife Drive and Fishing Loop closed

Four bridges are being repaired on the auto drives. Both the Marshland Drive and the Fishing Loop will be closed this season to vehicles, bicycles, and foot traffic.

Other opportunities to try

Driggs River Road access area:

- Watch for wildlife, habitat at this location includes early successional forest, open field, ditch and pool system
- Hike or bicycle the roads
- Fish C-3 Pool

Robinson Road access area:

- Watch for wildlife, habitat at this location includes early hardwood forest, open field, pool system
- Hike or bicycle the roads
- Hike the trails

Paddle Manistique River:

- Watch for wildlife, habitat at this location includes mixed forest types, pine and hardwood, and the river
- Canoe or kayak the 4-hour float through the refuge
- Go fishing

Whitefish Point Unit:

- Watch for wildlife, habitat at this location includes Lake Superior beach and forested dunes
- Hike the boardwalk

Stay up to date on our progress and current closures

Closed areas are subject to change. We will re-open areas as quickly as we can. As projects progress over the season, and the next few years, other adaptations will have to be made:

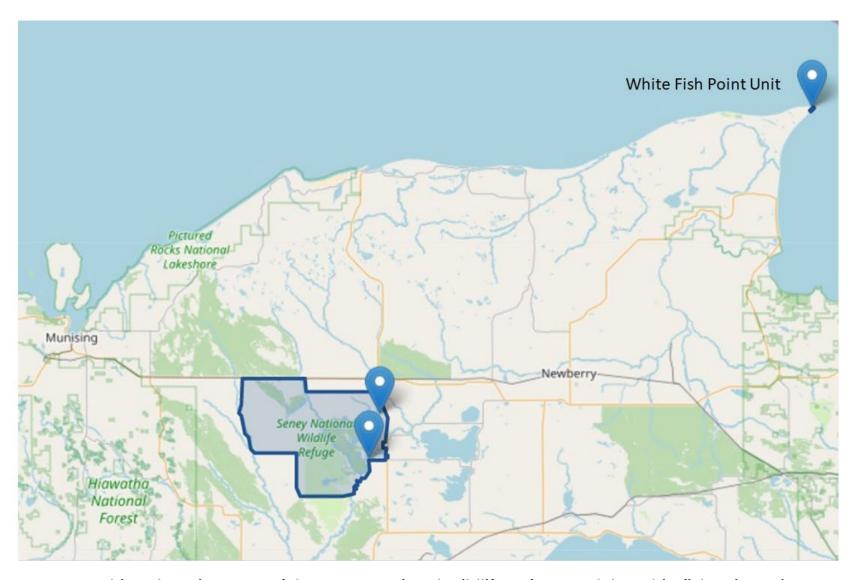

- the headquarters offices will be moved to another building, about ¼ mile down the road from the existing location
- the Show Pool Shelter alongside M-77- will be closed in order to fix the breech in the dike, return water to the Show Pools, and build a new restroom.
- the Pine Ridge Nature Trail will have closures during the visitor center construction and when the trail is refurbished.
- the Refuge Entrance Road will be closed during some aspects of construction and will be repayed as the visitor center and office are completed

Keep an eye on the website for project details and closures www.fws.gov/refuge/seney

Questions?

Come see us at the temporary visitor center or call 906-286-1599 during visitor center hours.
