Klamath River Carcass and Redd Surveys Update October 31, 2011

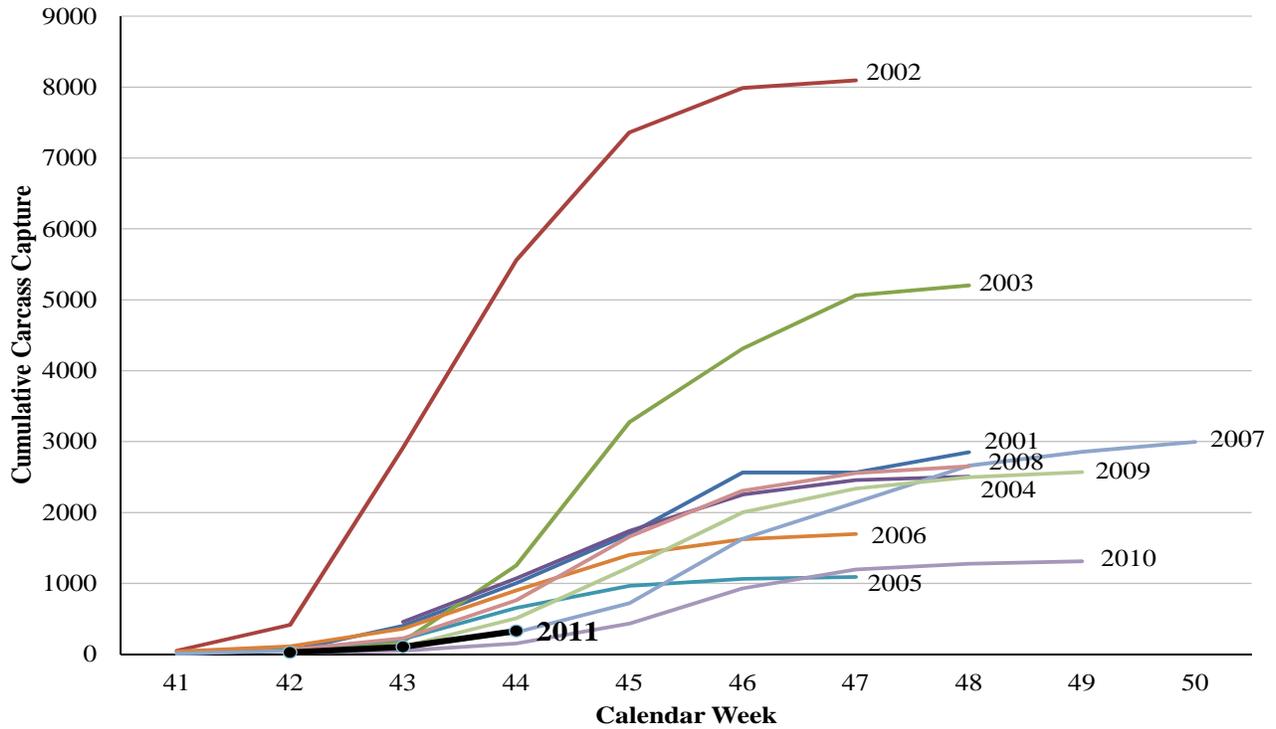

Synopsis: The 2011 fall-run Chinook salmon carcass and redd surveys on the mainstem Klamath River are conducted jointly by the USFWS Arcata Fish and Wildlife Office (AFWO), Karuk Tribe of California (KTOC), Yurok Tribal Fisheries Program (YTFP), and USGS Fort Collins Science Center. Both surveys began the week of October 10, 2011. Weekly tag-recovery carcass surveys are conducted by AFWO and YTFP crews from Iron Gate Dam to the Shasta River confluence. Weekly redd surveys are conducted by AFWO and KTOC crews from the Ash Creek confluence to the Indian Creek confluence at Happy Camp.

Carcass captures and redd counts are compared to previous years' surveys in the following charts. Note that the numbers presented in the figures are actual cumulative counts that have not yet been expanded into escapement estimates.

The data presented here are preliminary in nature and subject to revision.

If you have any questions regarding this summary, please contact Steve Gough at (707) 825-5197.
