

**Southern Subregion  
WILDLAND FIRE MANAGEMENT PLAN**

**TABLE OF CONTENTS**

**0.0 Introduction**

- 0.1 Fire Management Program
- 0.2 Long-Term Strategic Fire Protection Plan
- 0.3 Short-Term Tactical Fire Suppression Plan
- 0.4 Prescribed Fire Program
- 0.5 Research and Monitoring Criteria

**Part I – Fire Management Program**

**1.0 The Planning Context**

- 1.1 Land Management Goals
- 1.2 Keys to Fire Management
- 1.3 Management Objectives
- 1.4 Preparing Management Plans and Models
  - 1.4.1 Identifying Uncertainties and Knowledge Gaps in Management Plans
- 1.5 Site description
  - 1.5.1 Location
  - 1.5.2 Maps of Land Use Classifications
    - 1.5.2.1 Land Uses
    - 1.5.2.2 Land Ownership
  - 1.5.3 Maps of Various Natural Resources
    - 1.5.3.1 Topography and Soils
    - 1.5.3.2 Hydrology Climate
    - 1.5.3.3 Vegetation
      - 1.5.3.3.1 Non-native grasslands
      - 1.5.3.3.2 Diegan Sage Scrub
      - 1.5.3.3.3 Chaparral
      - 1.5.3.3.4 Riparian
      - 1.5.3.3.5 Oak Woodland
    - 1.5.3.4 Wildlife
    - 1.5.3.5 Cultural Environment
      - 1.5.3.5.1 Pre-Settlement
      - 1.5.3.5.2 Settlement

- 1.5.3.5.3 Recent Land Use
- 1.6 Natural and Historic Role of FIRE
  - 1.6.1 Natural Fire
  - 1.6.2 Historical Uses of Fire
- 1.7 The Fire Environment
  - 1.7.1 Fire Weather
  - 1.7.2 Fire History (Maps 1-9A – 1-9K)
- 1.8 Fuels
- 1.9 Fire Effects
  - 1.9.1 Plant Community Response to Fire
    - 1.9.1.1 Coastal Sage Scrub
    - 1.9.1.2 Grasslands
    - 1.9.1.3 Oak Woodland
    - 1.9.1.4 Riparian
  - 1.9.2 Wildlife Response To Fire

## **Part II – Long-Term Strategic Wildland Fire Protection Plan**

- 2.0 The Long-Term Strategic Wildland Fire Protection Plan
  - Introduction
    - 2.1 The Role of Fire in the Lands of Orange County
    - 2.2 The Threat of Wildfire to the Wildland Urban Interface (WUI) or Intermix
      - 2.2.1 Structure Ignition Sources
        - 2.2.1.1 Radiation
        - 2.2.1.2 Convection
    - 2.3 Fire Management Compartments (FMC's) and Fire Management Units (FMC's)
      - 2.3.1 Fire Management Compartments (FMC's)
      - 2.3.2 Fire Management Units (FMU's)
    - 2.4 Fuel Treatment to Protect Life and Property
      - 2.4.1 Recommended FMU's In Need of Fuel Treatment to Protect Life and Property in New Proposed Developments
        - 2.4.1.1 Rancho Mission Viejo
        - 2.4.1.2 Fuel treatment Options to Protect Life and Property
        - 2.4.1.3 Fuel Modification Zones by FMU
        - 2.4.1.4 Fuel Modification Zone A
        - 2.4.1.5 Fuel Modification Zone B

- 2.4.1.6 Fuel Modification Zone C
- 2.4.1.7 Required Building Setbacks  
from Edge of Slopes
- 2.4.1.8 Fire Resistant Structure Requirements For Specific  
Perimeter Structures
- 2.4.2 Jurisdictions outside the Rancho Mission  
Viejo Planning Area in the Southern  
Subregion
- 2.5 Fuel Treatment to Protect Biological, Cultural and  
Historic Resource values
  - 2.5.1 Recommended FMU's In Need of Fuel  
Treatment to Protect Biological Values
    - 2.5.1.1 Rancho Mission Viejo
    - 2.5.1.2 Sensitive Species
    - 2.5.1.3 Historically Sensitive Areas
    - 2.5.1.4 Culturally Sensitive Areas
  - 2.5.2 Fuel Treatment to Protect Biological,  
Cultural and Historic Resource Values  
in the Southern Subregion Outside of  
the RMV Lands
- 2.6 Fuel Models
  - 2.6.1 Fuel Model Classifications
    - 2.6.1.1 The National Fire-Danger  
Rating System (NFDRS)
  - 2.6.2 Aids to Determining Fuel Models for  
Estimating Fire Behavior
  - 2.6.3 Expected Fire Behavior Projections  
By Various fuel Models
    - 2.6.3.1 Grass Group Fuel Models
    - 2.6.3.2 Shrub Group Fuel Models
    - 2.6.3.3 Tree group Fuel Models
    - 2.6.3.4 Additional fire Behavior  
Influence of a 20 MPH wind Speed
    - 2.6.3.5 Grass Group
    - 2.6.3.6 Shrub Group
    - 2.6.3.7 Tree Group
    - 2.6.3.8 Additional Fire Behavior  
Influence of a 60 MPH Wind speed
    - 2.6.3.9 Grass Group
    - 2.6.3.10 Shrub Group

- 2.6.3.11 Tree Group
- 2.6.4 Fire Suppression Capability Interpretation  
Based on Flame Lengths and fire Intensity

### **Part III – Short-Term Tactical Fire Suppression Plan**

#### 3.0 Background

- 3.1 Preparation of the Fire Management Plan
- 3.2 Structure of the Plan
  - 3.2.1 How Part IV is Developed
- 3.3 Fire Suppression Policies For Biologically Sensitive Areas
  - 3.3.1 Bulldozer Policy
  - 3.3.2 New Fire Roads Policy
  - 3.3.3 Backfiring Policy
  - 3.3.4 Ground Tactical Units Policy
  - 3.3.5 Off-Road Policy
  - 3.3.6 Grading Techniques and Erosion Control Policy
  - 3.3.7 Water Saturation as Mop-up Technique Policy
  - 3.3.8 Fire Prevention Techniques Policy
- 3.4 Elements of the Tactical Fire Suppression Plan
  - 3.4.1 Intent
  - 3.4.2 Delineation of Fire Management Compartments and Fire Management Units
  - 3.4.3 Habitat Reserve Ratings/Tactical Operation Modes/Fire Suppression Guidelines
    - 3.4.3.1 Aggressive (Tactical Operations Mode “Direct Attack”)
    - 3.4.3.2 Standard (Tactical Operations Mode “Combination Attack”)
    - 3.4.3.3 Modified (Tactical Operations Mode “Indirect Attack”)
  - 3.4.4 Habitat Reserve Rating Form
  - 3.4.5 Fire Response Procedures
    - 3.4.5.1 Notification
    - 3.4.5.2 Initial Attack Response

- 3.5 Resource Advisor (Lead Resource Advisor Role)
  - 3.5.1 Notification and Coordination of Other Designated Resource Advisors
  - 3.5.2 Lead Resource Advisor Response
- 3.6 Post-Fire Evaluation
- 3.7 Training Sessions
- 3.8 Review and Approval
- 3.9 Post Fire Reporting
- 3.10 Tactical Fire Suppression Plan Maintenance
  - 3.10.1 FMC/FMU Mapping Maintenance
  - 3.10.2 Habitat Reserve (HR) Rating Form Maintenance
  - 3.10.3 Resource Sensitive Areas Mapping
- 3.11 Tactical Fire Suppression Interagency Coordination and Training
  - 3.11.1 OCFA Battalion Chief Training Sessions
  - 3.11.2 Coordination with Other Wildland Fire Agencies
  - 3.11.3 Habitat Reserve Land Managers**

## **Part IV – Prescribed Fire Program**

- 4.0 Prescribed Fire Program
  - 4.1 Justification
  - 4.2 Prescribed Fire Program Structure
    - 4.2.1 CSS Management (A) Sites
    - 4.2.2 Native Grassland Management (B) Sites
    - 4.2.3 Chaparral/Shrub Management (C) Sites
    - 4.2.4 Oak Woodland (D) Sites
    - 4.2.5 Protection of Life and Property (E) Sites
  - 4.3 Prescribed Fire
    - 4.3.1 Natural (Unplanned) Fire
    - 4.3.2 Managed (Planned) Ignitions
  - 4.4 Prescribed Fire Prescription Matrix
  - 4.5 Prescribed Fire Planning Model
  - 4.6 Pre-Burn Planning Process and Checklists**

## **Part V – Fire Ecology Research and Monitoring**

- 5.0 General

- 5.1 Relationship of the Wildland Fire Management Plan to a Stressor Based Adaptive Management Program
- 5.2 Monitoring to Test Hypotheses

**APPENDICES:**

FIREWISE Landscape Planting Considerations, Recommended & Not-Recommended Plant List	N-A
Invasive Plant & Weed List	N-B
Fire Behavior Calculations	N-C
Glossary	N-D
Chino Hills State Park Fire Prevention & Fire Management Plan	N-E
Literature Cited	N-F
