I will discuss this with our Regional Cultural Resources Program ASAP and let you know what I find out.

Thanks for making me aware of the issue.

Good Afternoon Jennifer,

We received a reply from the Army Corps in reference to the above project stating that they have never received the archaeological survey report or any other consultation documents for this project from USFWS. I know the Corps has USFWS listed as the shared lead on this project with Jamestown, is USFWS waiting for the Tribe to complete the 106 process? I think there has been a breakdown in communication and somehow USACE has not received the report 11 months later, which is a bit alarming. Please let me know what I can do to help get the ball rolling on this.

Thank you,
