Subject: Re: [EXTERNAL] Documents for our meeting on Monday

Hi, All:

For today's meeting, I believe we'll be discussing development of resource management and sampling objectives for a survey(s) to assess effects on migratory birds (e.g., brant, shorebirds). As I mentioned during our previous call, paired resource management and

sampling objectives are the foundation for the development of survey protocols. In fact, a survey's sampling design, data management, data analysis, and reporting should be focused on addressing the survey's sampling objective(s).

In the survey protocol handbook that I previously shared, please refer to pages 11-13 for more information about management and sampling objectives. For the process that refuges use to develop their SMART resources management objectives, see the attached Identifying Refuge Resources of Concern and Management Priorities Handbook, where I had the opportunity to contribute to the development of the current (2017) and initial (2010) versions of this handbook. Plus, I spent 10 years of my FWS career assisting refuge staffs with development of SMART (specific, measurable, achievable, results oriented, and time specific) resource mgmt objectives for their Comprehensive Conservation Planning (CCPs) and stepdown Habitat Management Planning (HMPs).

I look forward to our discussion today.

Thank you Kevin for the link and it was also a pleasure meeting everyone today. We look forward to seeing everyone again on Wednesday, April 14th at 9:00 am. I'll send the invitation later on today.

It was a pleasure to meet you on today's call and I look forward to working with you in designing a scientific project to assess potential impacts from aquaculture on shorebird and other waterbird use. As we discussed, here is the [link](#) to the Survey Protocol Handbook that provides guidance on preparing site-specific protocols. It articulates the standards for protocols of survey being conducted on refuges.

Hi All,

Attached please find the documents that we will be discussing at our Monday meeting at 9:30am. I look forward to working with all of you in getting these tasks accomplished.
