

River Miles of the Green River through Seedskadee NWR

River Miles between Boat Ramps

Slate Creek Campground to Dodge Bottom Boat Ramp.....5 miles
Dodge Bottom Boat Ramp to Hay Farm Boat Ramp..... 7 miles
Hay Farm Boat Ramp to Highway 28 Boat Ramp..... 9 miles
Highway 28 Boat Ramp to 6 Mile Hill Boat Ramp.....10 miles
6 Mile Hill Boat Ramp to OCI/County Rd 6 primitive pull out.....10 miles

River Miles

Fontenelle Dam.....0 river mile
Slate Creek Campground4.6 miles from Fontenelle Dam
N. Boundary of Refuge.....7.3 miles from Fontenelle Dam
Upper Dodge Bottoms Boat Ramp.....9.6 miles from Fontenelle Dam
Hay Farm Boat Ramp..... 16.6 miles from Fontenelle Dam
Highway 28 Bridge Boat Ramp.....25.2 miles from Fontenelle Dam
6 mile Hill Boat Ramp..... 34.3 miles from Fontenelle Dam
S. end of Big Island off refuge.....42.8 miles from Fontenelle Dam (estimate no boat ramp)
OCI Bridge / County Rd 6.....44.8 miles from Fontenelle Dam (primitive boat ramp)

Estimated Float times @ 800-1000 cfs river flows

Drift boat.....1.5 river miles an hour
Canoe/Kayak.....2 river miles an hour

TIPS to help plan float trips accordingly:

- Float times are estimates and will vary greatly with river flows, wind, and chosen watercraft. Larger watercraft, high wind and lower river flows will result in slower float times, while smaller watercraft and higher flows will result in faster float times.
- Float time speeds were estimated with no wind and at river flows of 800 to 1000 cfs (cubic feet per second) – check the U.S. Bureau of Reclamation website to determine current Green River flows above the Refuge at <https://www.usbr.gov/rsvrWater/rsv40Day.html?siteid=916&reservoirtype=Reservoir> or <https://waterdata.usgs.gov/monitoring-location/09211200/#dataTypeId=continuous-00060-0&period=P7D>
- Be sure to check the weather forecast for the Refuge at NOAA's <http://forecast.weather.gov/MapClick.php?lat=41.91351937007709&lon=-109.9127197265625&site=riw&unit=0&lg=en&FcstType=text>
- Wind generally picks up in the afternoon on the refuge and summer thunderstorms in the afternoon can dramatically drop temperatures. When on the river, be prepared for cold or wet weather even in the height of summer.
