

CALIFORNIA CONDOR POPULATION SIZE AND DISTRIBUTION

June 1, 2006

(status through May 31, prepared June 7, 2006)

Overview Page

Refer to the subsequent pages for details and trends

TOTAL POPULATION

299

CAPTIVE POPULATION

159

Los Angeles Zoo	31 (includes 3 for Baja)
San Diego WAP	28 (includes 2 for Baja)
WCBP Boise	60 (includes 7 to AZ, 1 to OR)
Oregon Zoo	20 (includes 2 chicks from 2006)
Mentor birds in field pens	5 (#79,226 SoCal) (64 Baja) (Ventana 155) (OR 36)
Pre-release birds in field pens	5 (CA) 10(AZ)

WILD POPULATION

140

California		67
Wild-fledged	1	
Wild, Southern California-released birds	20	
Wild, Central California-released birds	44	
Big Sur-31		
Pinnacles-13		
Nestlings in wild nests	2	
Baja California		15
Wild, from releases	12 (1 recent death to lead poisoning)	
Being held in pre-release flight pen	3	
Arizona		58
Wild-fledged	4	
Wild, from releases	54	
Nestlings in wild nests	0	

Production in the Wild

Southern California- Four pairs produced eggs, two nests failed, two pair feeding nestlings.

Central California- No verified breeding . 3 possible pairs

Arizona –Four pairs, all failed at egg stage.

Baja-No nesting attempts

Production in 2006:

San Diego Wild Animal Park: 11 eggs laid, 6 hatched successfully, 5 died during incubation

Los Angeles Zoo: 8 eggs laid, one died before hatching; 7 hatched plus one chick from a fertile egg brought in from the wild. One fertile egg transferred to a wild nest.

World Center for Birds of Prey: Fourteen eggs laid, all hatched, 2 to San Diego W. A. P.

Oregon Zoo: 3 eggs laid, all hatched. One chick died, unkn.

CALIFORNIA CONDOR POPULATION SIZE AND DISTRIBUTION

June 1, 2006

(status through May 31 2006, prepared June 7)

TOTAL POPULATION

298

CAPTIVE POPULATION

Los Angeles Zoo	31
San Diego WAP	28
WCBP Boise	60
Oregon Zoo	20
Mentor birds in field pens	5
Pre-release birds in field pens	
Southern California	5
Central California	0
Baja California	2
Arizona	10

WILD POPULATION

California		67
Flying, wild-fledged	1	
Southern California-released birds		
Flying	20	
Mentors in flight pen	2	
Central California-released birds		
Flying	42	
Nestlings in wild nests	2	
Baja California		15
Flying, from releases	12	
Mentor in flight pen	3	
Arizona		58
Flying, wild-fledged	4	
Flying, from releases	54	
Recaptured, temporarily held in field pen		
Nestlings in wild nests	0	

Wild Population Statistics, December 1, 2005

Releases:

1988-92: So. CA – 15 Andean condors released, 1 died, 14 recaptured and released in South America

1992-95: So. CA – 13 California condors released in 1992-93: 6 died, 7 returned to captivity permanently

1995 – (2005, through November):

California Condors Released

	1995	1996	1997	1998	1999	2000	2001	2002	2003	2004	(2005)	2006	Total
California	14	8	12	0	13	9	10	14	5	14	8	6	107

Wild Production, 2001- 2006

Egg-laying pairs in the wild, California: **2*** in 2001; **3** in 2002; **1** in 2003; **3** in 2004; **3** in 2005; **4** in 2006 (*one trio with 2 eggs)

Egg-laying pairs in the wild, Arizona: **1** in 2001; **2** in 2002; **3** in 2003; **2** in 2004; **3** in 2005; **4** in 2006

Wild-fledged birds, California: **1** in 2004

Wild-fledged birds, Arizona: **1** in 2003, **2** in 2004, **2** in 2005, **0** in 2006

Of **18** wild-laid eggs, **1** hatched in captivity and was released to the wild, **10** hatched in the wild (fate of nestlings: **4** fledged, **1** in rehab, **5** died), and **7** eggs failed (broken, died, or fate unknown)

Production in 2006: Eggs: 36 captive-laid and 8 wild-laid; **Nestlings:** 29 surviving young birds were produced in captivity; 2 surviving nestlings were produced from wild eggs.

Los Angeles Zoo – 8 eggs laid: 1 egg died, 7 nestlings

San Diego WAP – 11 laid: 5 eggs died or infertile; 6 nestlings,

WCBP Boise – 14 laid: 12 eggs hatch at WCBP, 2 eggs to SDWAP hatch

Oregon Zoo – 3 laid, 3 fertile: 1 fostered chick dies, 2 nestlings

Wild, California – 4 laid: 2 failed at hatching, 2 chicks in nests (1 from LA Zoo as pipping egg)

Wild, Arizona – 4 laid: 1 broken, 1 abandoned when male taken into captivity for lead poisoning, 2 infertile

Explanatory Notes

Numbers reported in the monthly status report should be treated as tentative data. These are based on the best information available each month from cooperators in the field and facilities. If a reporting error is discovered after posting online, no correction will be disseminated, unless the error is substantive. Occasionally, a missing bird will continue to be reported live each month until field personnel are satisfied that there is little likelihood it is still alive. For such individuals, the date last detected normally is presumed to be the date of death. Questions about these summaries should be directed to RJurek @ dfg.ca.gov.

SB# - Condor Studbook number

"CAPTIVE POPULATION" includes:

- birds captured from the wild prior to 1988 that are still in a captive facility (e.g., zoo)
 - previously released birds returned to captivity permanently or for care and possible re-release
 - surviving chicks and juveniles (excludes eggs laid)
 - captive-hatched birds retained for captive breeding
 - young birds held in breeding facilities in preparation for transfer to a field pen for release
 - "mentor birds" from a captive facility transferred temporarily into a field pen to aid socialization of pre-release birds
 - birds transferred from a captive facility to a field pen in preparation for initial release or re-release
 - LAZ is Los Angeles Zoo; WAP is Wild Animal Park, Zoological Society of San Diego; WCBP is World Center for Birds of Prey, The Peregrine Fund; OZ is Oregon Zoo
- "Released" refers to birds raised in captivity and introduced to the wild; to previously released birds that were translocated to a second population (date of release to the second population becomes the release date for tracking purposes); and to birds captured prior to 1988 that were returned to the wild after 1995.
- "Re-released" refers to previously released birds that were re-captured temporarily and held in field pens, or that were re-captured for long-time care or observation in breeding facilities, and that were later returned to their original wild population .
- "WILD POPULATION" includes:
- free-flying birds recently accounted for
 - free-flying birds, assumed to be alive, although not recently accounted for
 - nestlings in wild nests
 - temporarily re-captured wild birds, held in a field pen, that are intended to be re-released soon
- "So. Calif." refers to birds originally released at sites from San Luis Obispo County to Ventura County by the U.S. Fish and Wildlife Service Hopper Mountain National Wildlife Refuge Complex. Birds released in the two California release areas now freely intermingle.
- "Central Calif." refers to birds originally released at sites north of San Luis Obispo County by the Ventana Wilderness Society. Birds released in the two California release areas now freely intermingle.
- "Baja Calif." refers to birds originally released in Baja California, Mexico, by the Zoological Society of San Diego, the Centro de Investigación Científica y de Educación Superior de Ensenada, and the Instituto Nacional de Ecología.
- "Arizona" refers to birds released by The Peregrine Fund in Arizona and that range in Arizona and other states east of Calif.

Mortalities requiring law enforcement investigation often will not be publicly reported immediately.
