

Partners for Fish and Wildlife

- A partnership between the Service and private landowners
- Focuses on enhancement and restoration of fish and wildlife habitat
- Offers financial and technical assistance to private landowners
- Assists landowners in creating or enhancing habitat for rare or declining species
- Typical species may include bobwhite quail, gopher tortoise, migratory birds, and a variety of aquatic species

Typical Projects Include

- Longleaf pine planting
- Prescribed burning
- Wetland restoration
- Stream bank stabilization
- Water quality improvement
- Riparian buffer establishment
- Livestock exclusion
