Subject DWH ESA CZMA ASAP

How's that for a bureaucratic subject line?

I looked back through the CZMA's from Phase I and noticed that none of those concurrences mentioned ESA with the exception of Alabama's. And we did make ESA determinations for each project--we just didn't mention them. So we may be creating work for ourselves here.

Nevertheless, here's the information I promised. First time I've given it this much thought, and the list is a little bigger than I previously imagined. Just being very cautious. As you can probably tell, the turtles don't have CH.

By State, Project, resource, determination

MS Shorebird Project: Piping Plover CH, no effect

MS Shorebird Project: Loggerhead, Green and Kemp's Ridley Sea turtles, May Affect Not Likely to Adversely Affect

AL Shorebird Project: Piping Plover CH, no effect

AL Shorebird Project: Alabama beach mouse and its CH, May Affect Not Likely to Adversely Affect

AL Shorebird Project: Loggerhead, Green and Kemp's Ridley Sea turtles, May Affect Not Likely to Adversely Affect

AL Lighting Project: Alabama and Perdido Key beach mouse and their CH, no effect

AL Lighting Project: Loggerhead, Green and Kemp's Ridley Sea turtles, no effect

FL Shorebird Project: Piping Plover CH, no effect

FL Shorebird Project: Loggerhead, Green and Kemp's Ridley Sea turtles, May Affect Not Likely to Adversely Affect

FL Shorebird Project: Perdido Key, Choctawhatchee and St. Andrews beach mouse and their CH, May Affect Not Likely to Adversely Affect

FL Lighting Project: Perdido Key, Choctawhatchee and St. Andrews beach mouse and their CH, no effect

FL Lighting Project: Loggerhead, Green and Kemp's Ridley Sea turtles, no effect
