Ms. Erin Chandler  
Fish and Wildlife Service  
Gulf Restoration Office  
341 Greeno Road North, Suite A  
Fairhope, Alabama 36532

Dear Ms. Chandler:

The Fish and Wildlife Service's (Service) Mississippi Field Office has reviewed the Deepwater Horizon Oil Spill natural resource restoration project titled "Wolf River Coastal Preserve Habitat Management-Dupont and Bell's Ferry Tracts". Our comments are in reference to compliance with the Endangered Species Act (ESA) (87 Stat. 884, as amended; 16 U.S.C. 1531 et seq.).

The proposed project includes restoration and management actions on the Dupont and Bell's Ferry Tracts, owned by the Mississippi Department of Marine Resources and managed as part of the Wolf River Coastal Preserve.

We concur with your determination that the proposed project "may affect, but is not likely to adversely affect" the black pine snake, dusky gopher frog, eastern black rail, gopher tortoise, Louisiana quillwort, and wood stork. Unless the project description changes, or new information reveals that the effects of the proposed action may affect listed species in a manner or to an extent not considered, or a new species or critical habitat is designated that may be affected by the proposed action, no further action pursuant to the ESA is necessary.

If you have any questions, please contact David Felder in this office, telephone (601) 321-1131.

Sincerely,

*Stephen Ricks*  
Stephen M. Ricks  
Field Supervisor  
Mississippi Field Office
