It looks like there is no follow up memo needed on the NMFS side, as long as you are within the PDCs. The RW RP1 does note that CZMA was phased, so there might be something to follow up on there. I didn't track down the CZMA response from MS, so I'm not sure. I'm just going off the compliance table in RW RP1.

I have a couple questions, but generally yes I think this all fits within the NMFS PDCs. See attached with questions/comments. I will also have to look back through some emails to see how we planned to handle compliance now that we know methods/locations - I may need to write up a memo. I'll get back to you on that.

Hi Christy,

MDEQ has been working on developing project implementation activities for the NRDA Regionwide RP1 "Reducing Marine Debris Impacts on Birds and Sea Turtles" project and we would like to request a quick review on the attached writeup to confirm that our activities fit within the scope of activities described in the BE form and the NOAA PDCs. Please let me know if we need to provide additional information or if setting up a call would be more helpful.

Thank you so much!

Rachel
