Talking with the ERP manger that comments is a general one and would apply to all projects occurring within the DEP Northwest District area.

Chris, thanks for the letter.

Second paragraph of your letter, says

“ Based on the information provided, an Environmental resource Permit and a wastewater permit from the Florida Department of Environmental Protection’s Northwest District has noted that for the project, an Environmental Resource Permit may be required if construction will take place in wetlands/surface waters.”

Which one of the 13 projects does this refer to?

Thanks,

Phil

RE: U.S. Department of the Interior and National Oceanic and Atmospheric Administration, Natural Resource Damage Assessment, Deepwater Horizon Oil Spill, Proposed Draft Restoration Plan 3 and Environmental Assessment: Water Quality, 13 Damage Assessment Restoration Projects in the Florida Restoration Area, Florida
SAI # FL202403080041C

Dear Tim:

Florida State Clearinghouse staff has reviewed the proposal under the following authorities: Presidential Executive Order 12372; § 403.061(42), Florida Statutes; the Coastal Zone Management Act, 16 U.S.C. §§ 1451-1464, as amended; and the National Environmental Policy Act, 42 U.S.C. §§ 4321-4347, as amended.

Based on the information provided, an Environmental resource Permit and a wastewater permit from the Florida Department of Environmental Protection's Northwest District has noted that for the project, an Environmental Resource Permit may be required if construction will take place in wetlands/surface waters.

If prehistoric or historic artifacts, such as pottery or ceramics, projectile points, dugout canoes, metal implements, historic building materials, or any other physical remains that could be associated with Native American, early European, or American settlement are encountered at any time within the project site area, the permitted project shall cease all activities involving subsurface disturbance in the vicinity of the discovery. The applicant shall contact the Florida Department of State, Division of Historical Resources, Compliance and Review Section at (850)-245-6333. Project activities shall not resume without verbal and/or written authorization. In the event that unmarked human remains are encountered during permitted activities, all work shall stop immediately and the proper authorities notified in accordance with Section 872.05, Florida Statutes.

Based on the information submitted and minimal project impacts, the state has no objections to allocation of federal funds for the subject project and, therefore, the funding award is consistent with the Florida Coastal Management Program (FCMP). The state's final concurrence of the project's consistency with the FCMP will be determined during any environmental permitting processes, in accordance with Section 373.428, Florida Statutes, if applicable.

Thank you for the opportunity to review the proposed plan. If you have any questions or need further assistance, please don't hesitate to contact me.

Sincerely,

Chris Stahl
