Dear Cooperator:

The Sand Lake Wetland Management District (WMD) is seeking cooperators to submit a sealed bid(s) for grazing opportunities within the WMD. A map showing all lands offered within the Sand Lake WMD is enclosed. Please familiarize yourself with the WMD Waterfowl Production Areas (WPA) that have been put forth for grazing. Please review the bid prospectus for each WPA before submitting your bid. Each grazing unit will have requirements for fencing (possibly external fence replacement or maintenance and/or internal electric fence), water (only if no natural source is available), and possible livestock rotation.

All bids remain sealed and will be opened on the same day and high bidders will be notified promptly of their selection. Bids received after the closing date will be returned to the bidder unopened. Bids not in conformance with the advertised terms of the sale will be rejected. You may submit bids for multiple WPAs. The Sand Lake WMD reserves the right to reject any or all bids that do not meet the requirements identified in the bid prospectus. Furthermore, the Sand Lake WMD also reserves the right to reject bids from any bidders that have previously violated the terms of grazing Special Use Permits (SUP).

Winning bidders must complete a Cooperative Agricultural Agreement (CAA) with a Sand Lake WMD Refuge Manager within three weeks of winning bid notification, and before any livestock is released onto the grazing unit. The CAA will include the Commercial Special Use Permit and an Annual Plan of Operations.

Your bid package must include: (1) a completed first page of the Commercial Activities Special Use Permit Application, USFWS Form 3-1383-C; and (2) a signed bid worksheet. The bid form can be mailed, emailed, faxed, or hand-delivered to our office. Grazing bids will be accepted until **March 11, 2022**. Please mail, email (sydney_hanna@fws.gov), fax (605-885-6333), or hand-deliver your bids. If you do not have access to a computer, contact us and we will send information via mail. Thank you for showing interest in our programs and call me at (605)885-6272 or (701)403-6728 with any questions.

Sincerely,

Sydney Hanna
Sand Lake WMD Manager

Sand Lake Waterfowl Production Area (Maunu)- Brown County

You are bidding on grazing this unit for 2 years (2022 to 2023), and the AUM bid rate is for the life of the Cooperative Agricultural Agreement (CAA). Every year the permittee will be required to develop an annual Plan of Operations with Sand Lake WMD. There will be a minimum of 240 AUMs in 2022, and the AUMs in 2023 will be 240. Grazing can start as early as August 1, 2022.

WPA Description and Conditions

The Proud WPA is a total of 230 acres containing approximately. This WPA has poor fence condition. Please inspect fences before bidding. Natural wetlands provide water in cell 1. Vegetation in the WPA consists of a combination of grasses, sedges, cool season tame grass, and cattails.

Legal: 124-64-24 Township: Lincoln

Lessor Responsibilities

Fencing: Materials will be the responsibility of the permittee and all electric fences will be removed one month after the final grazing date.

Water Source(s): The available sources will likely provide adequate amounts for livestock during the length of the grazing period, but this is not guaranteed and should be checked throughout the grazing period. If circumstances arise where water is inadequate, then water will need to be supplied by the permittee.

Salt and Minerals: Salt and mineral containers need to be moved throughout the grazing period and placed away from water sites.

Payment: The Sand Lake WMD will submit a bill to the Interior Business Center (IBC) by December 1st, then IBC will generate an invoice that will be sent to the permittee. Payment is due 30 days after the invoice is received and is accepted through a check or credit card.

****Please refer to the Special Conditions section for all other permittee responsibilities.***

Proud WPA Grazing Management Plan

*A minimum bid of \$10/AUM is required.

<u>Unit</u> <u>Acres</u>	<u>Year</u>	<u>Grazing Period</u>	<u>AUMs</u>	<u>Grazable</u>
#1	2022	August 1- August 31	96	Approx. 90
#2	2022	September 1- October 15	144	Approx. 140
#2	2023	August 1- September 15	144	Approx. 140
#1	2023	September 16- October 16	96	Approx. 90

Livestock in year 2022 & 2023

Unit 1- 80 cow/calf pair (2022)

Unit 2- 80 cow/calf pair (2022)

Unit 2- 80 cow/calf pair (2023)

Unit 1- 80 cow/calf pair (2023)

Requirements

Cooperator is encouraged to check the condition of the fences prior to bidding. Some boundary fences may be in poor condition due to snow and/or high water. Should the cooperator choose to repair the permanent barbed wire fence, the materials will be provided by the US Fish & Wildlife Service. It is preferred that the cooperator use their own materials and keep track of what they use on the WPA and the US Fish & Wildlife Service will reimburse the cooperator for the materials. Should the cooperator choose to use electric fence, the cooperator will be required to use their own materials.

Proud WPA

-  Grazing Unit 1- Approx. 90 Acres
-  Grazing Unit 2- Approx. 140 Acres
-  wpas

0.1 0.05 0 0.1 Miles

Grazing Special Conditions

- To be eligible to bid you must be a current livestock owner/operator.
- The entire amount of AUM's specified must be utilized during the period specified. More livestock for a shorter period will be allowed upon mutual agreement between the Cooperator and the WMD.
- Confinement of livestock to the unit is the responsibility of the permittee as is any damage to surrounding lands caused by the permittee's livestock.
- Permittee is responsible for all fence maintenance and repairs. **The permittee will be responsible to provide all materials necessary to maintain existing fences.** The USFWS will provide all materials used for a new or replacement permanent fence greater than a quarter-mile. All permanent fences will become the property of the USFWS after the grazing agreement has expired. Temporary electric cross fences remain the property of the permittee and are to be removed one month after the removal of livestock.
- If permanent fence installation is needed, it will be required that the permittee follow the fence specifications of the USFWS. All new fences will have 4 strands of 12 gauge barbed wire; h-braces (if replaced) will be (2) 8-inch posts with associated cross-post and 9 gauge smooth wire; gates (if replaced) will be 4 strand wire with stays, and the maximum spacing for steel posts will be 16 feet.
- If additional areas, not identified on the map, need a fence to be replaced during the life of the CAA, the costs associated with such fence replacement may be negotiated between the permittee and the Sand Lake WMD at that time.
- Natural water sources may exist on each WPA. Known water sources will be indicated on maps for each WPA. It is the permittee's responsibility to check the condition of the water sources. If water sources are inadequate, the permittee will need to provide water. Costs associated with providing water should be considered by the permittee before submitting a bid.
- The use of salt and minerals are allowed but should be located away from water sources to reduce overuse of the area by livestock. Mineral must be moved at the same time the livestock are rotated. All minerals must be removed at the end of the grazing period.
- Supplemental feeding will not be permitted (i.e., creep feeders, hay).
- With the exceptions of ear tags, no insecticide may be used on livestock while they are on the WPA. Treatment may be done before livestock are brought to the WPA.

- Subletting is strictly prohibited.
- The permittee must notify the Refuge Manager of deceased livestock. Deceased livestock must be removed from the WPA within 48 hours of discovery.
- Any damage to government property must be reported to the local Refuge Manager immediately and replaced by the permittee.
- All liability relating to livestock and livestock management, including all persons working for the permittee, is strictly that of the permittee listed on the CAA.
- Permittee must comply with all state and local livestock health regulations.

THE USFWS RESERVES THE RIGHT TO MODIFY OR TERMINATE THE CAA IF HABITAT CONDITIONS WARRANT. IF CHANGES TO THE PERMIT ARE DEEMED NECESSARY, THE PERMITTEE AGREES TO ABIDE BY THE CHANGES OR THE PERMIT WILL BE VOIDED. THE PERMITTEE WILL BE NOTIFIED AHEAD OF TIME IF ANY SUCH CHANGES ARE IMPLEMENTED.

ANY VIOLATION OF THE ABOVE REGULATIONS MAY RESULT IN THE IMMEDIATE CANCELLATION OF YOUR GRAZING PERMIT AND FORFEITURE OF FUTURE BIDDING ON GRAZING UNITS.

THE U. S. FISH & WILDLIFE SERVICE RESERVES THE RIGHT TO REJECT ANY OR ALL BIDS.

To submit a bid please submit the Sand Lake WMD Bid Form and the Special Use Permit Application Form. Please turn in your bids to the FWS Sand Lake Wetland Management District office no later than **4:00 PM March 11th, 2022**. **All envelopes must be marked WPA Grazing Bid in the lower left-hand corner of the envelope.** Bids will be received in person or by:

Mail: Sand Lake WMD
39650 Sand Lake Drive
Columbia, SD 57433
Email: sydney_hanna@fws.gov
Fax: (605)885-6333

Sealed bids will be opened by the WMD and permittees selected on March 14th, 2022 at 9:00 AM.

For any questions or further information please contact the Sand Lake Wetland Management District:

Sydney Hanna
Wildlife Refuge Specialist

email: sydney_hanna@fws.gov
phone: (605)885-6272 or (701)403-6728

Examples of how to calculate stocking rates:

The stocking rate for cow/calf pairs, using 180 AUM's (Animal Unit Months), 1.2 AUE (Animal Unit Equivalents), and the grazing period ratio of 42 days/30.5 days= 1.38 months

Step 1: AUM's / AUE → 180 AUM's / 1.2 AUE = 150 Animals

Step 2: Number of Animals/Grazing Period → 150 Animals/1.38 Months= 109 cow/calf pairs

The stocking rate for yearlings, using 180 AUM's (Animal Unit Months) and 0.7 AUE (Animal Unit Equivalents)

Step 1: AUM's / AUE → 180 AUM's / 0.7 AUE = 257 Animals

Step 2: Number of Animals/Grazing Period → 257 Animals/1.38 Months= 186 yearlings

Stocking Requirements: Sand Lake Wetland Management District will use 1.2 AUE's (Animal Unit Equivalents) to define a cow with a nursing calf less than 6 months of age. Other livestock will have AUE rates calculated according to the chart below.

Animal Unit Equivalents:

1 mature cow	1.0 AUE
1 cow/calf pair	1.2 AUE
1 bull	1.5 AUE
1 weaner calf.....	0.6 AUE
1 yearling (9-18 months).....	0.7 AUE
