

## RECREATION

### Our Vision

The Mountain-Prairie Region Fish and Aquatic Conservation Program will be a recognized leader in achieving sustainable populations of native species, conserving and restoring their habitats, and supporting sportfish management — in the face of changing climate conditions — for the benefit of current and future generations.

### Why the Emphasis

In order to effectively address our program vision, we commit to focusing our resources on the following actions in a manner that considers current and near-future challenges from climate, funding shortfalls, degrading infrastructure, invasive species and changing demographics.

### Core Values

All decisions and actions within the FAC program are steeped in our core values. These targets embrace all of these values.

**Adaptability**

**Communication**

**Our People**

**Partnerships**

**Public Service**

**Scientific Integrity**

**Stewardship**

*Advance our conservation mission through natural resource recreation and education.*

### Five-Year Targets

#### **FAC Relevance**

##### *SMART Targets*

Increase FAC visibility by updating the FAC economic impact study.

Increase recreational opportunities by FWCO's and hatcheries in the region by 30%.

#### **FAC Recreation**

##### *SMART Targets*

Fulfill current mitigation request with 100% reimbursement from Federal Action Agencies.

Obtain 95% reimbursement for recreational fish stocking.

#### **Tribal Recreation**

##### *SMART Target*

Support Tribal recreational fishing programs by meeting requests that align with Tribal and FAC mutual goals.
