Dayton Weir Historically

Dayton Weir Obermeyer September 2023

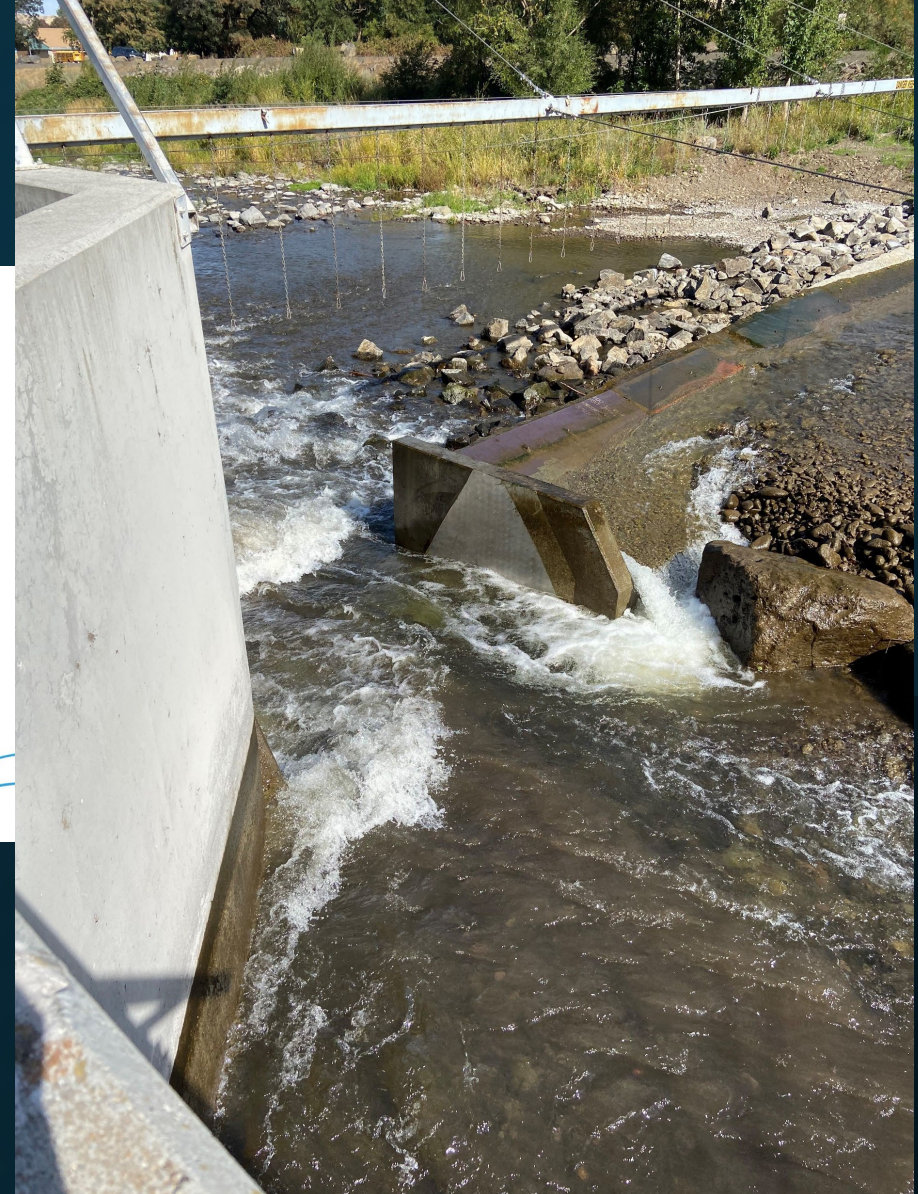

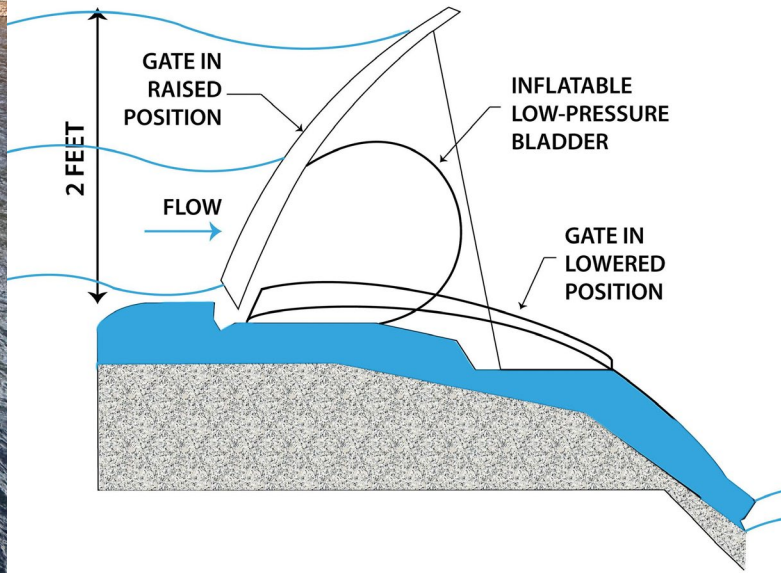

Dayton Weir Obermeyer

Dayton Weir Obermeyer

Weir operation to date:

- Completed in Fall 2023
- Bladder designed to depress at 1' elevation above weir
- Haven't had a flow event to depress the bladder
- Have dropped the weir during different flow regimes with varying levels of success
- Should be successful, but need to capitalize on high flow events
- Will still need to remove substrate this summer
