

Proposed Boundaries

JOHN H. CHAFEE COASTAL BARRIER RESOURCES SYSTEM

Huntington Beach Unit SC-03

This draft map was produced by the U.S. Fish and Wildlife Service to show proposed boundary changes to the John H. Chafee Coastal Barrier Resources System as directed by Section 4 of the Coastal Barrier Resources Reauthorization Act of 2005 (Pub. L. 109-226).

The seaward side of the CBRS unit includes the entire sand-sharing system, including the beach and nearshore area. The sand-sharing system of coastal barriers is normally defined by the 30-ft bathymetric contour. In large coastal embayments and the Great Lakes, the sand-sharing system is defined by the 20-ft bathymetric contour or a line approximately one mile seaward of the shoreline, whichever is nearer the coastal barrier.

For additional information about the CBRA or CBRS, please visit www.fws.gov/cbra.
