These verified data are a proportion of the total unverified data in the daily reports.

The Service is working as quickly as possible to review all of data in order to match up the verified numbers with the unverified numbers reported daily. However, there will continue to be a gap in the two sets of data as the quality assurance/quality control process is completed, which takes one to two weeks for each bird.

All data should be considered provisional, incomplete, and subject to change.
