

## **Arbor Day Vidcast**

Roya Mogadam Speaking:

Hi, I am Roya with the U.S. Fish and Wildlife Service.

Celebrate Arbor Day this year on April 30th by planting a tree in your backyard.

Trees in your backyard and neighborhood can be home to many different types of wildlife.

Trees also reduce your heating and cooling costs, help clean air, add beauty and color and provide shelter from the wind and sun.

Tree roots stabilize soil and prevent erosion, and improve water quality by slowing and filtering rain water.

So, let's go outside and plant a tree.
